Lévis Public Building: Jos. Couture.

AUDIT OFFICE, OTTAWA, April 22, 1908.

SIR,—Let me acknowledge receipt of your application No. 1004 for $1,072.40, in favour of Joseph Couture, being for final estimate to March 31, 1908, on his contract for the construction of a public building at Lévis, Que.

The estimate includes items of extra work, aggregating $6,326.90, and has the following certificate attached, signed by D. J. Mullarkey: 'I hereby certify that the above estimate is correct, that the total value of work performed and materials delivered by Jos. Couture up to March 31, 1908, is $27,432.40.' This amount is made up of $21,015.50 on the main contract and $6,326.90, extra work.

Inclosed is a copy of the statement of extra work, returned in the previous progress estimate, No. 8. This estimate had a similar certificate attached, signed by L. Auger, stating that 'the above estimate is correct, and the total value of work performed, and materials delivered by Jos. Couture up to October 29, 1906, is $29,621.25.' Corrections made in calculations by your accountant reduced this amount to $29,195.69.

Outside of items 12, 13 and 15, in the schedule of extra work in the final estimate, it is difficult to connect the amounts with those mentioned in estimate No. 8. Item No. 14, 'concrete floor in basement, 303 sup. yds., at $3.25=$984.75,' seems to be the work mentioned in estimate 8 as 'concrete floor in basement, 337 sup. yds., at $3.25 = $1,095.25;' but in the remaining items the two statements differ widely.

It seems, from the final estimate, that Mr. Auger had certified, in October, 1906, work performed in excess of that actually done to the amount of $4,869.10 ($11,196 —$6,326.90). Mr. Auger was still clerk of works in January, 1908. No estimate was returned between October 29, 1906, and March 31, 1908. Mr. Mullarkey was first employed on the work in June, 1906, on account of his knowledge of cement work. He seems to have been placed finally in complete charge of the construction work.

Some explanation should be given of this difference between the certified statements of Mr. Auger and Mr. Mullarkey; and the extras as mentioned in Mr. Mullarkey's estimate should be connected explicitly with the architect's orders authorizing them.

I am, sir, your obedient servant,

The Deputy Minister Public Works. J. FRASER, *A.G.*

Extra work on Joseph Couture's contract at Lévis Public Building, as stated in Estimate No. 8, certified as correct by L. Auger.

Ordered by Mr. Mullarkey—	
Concrete floor in basement, 337 sup. yds., at $3.25	$1,095 25
Ordered by S. Adams—	
Excavation outside, for facing in cement, 221 cu. yds., at $2.50	552 50
Ordered by letter, July 11, 1905—	
Foundation: Excavation, 623 cu. yds., at $2.50	1,557 50
Concrete, 210 cu. yds., at $9.50	1,995 00
Filling, 413 cu. yds., at $1.75	722 75
Ordered by Mr. Mullarkey—	
Facing: Cleaning faces of walls, 212 yds., at $1	212 00
Cementing walls, 1 inch thick, 212 yds., at $1	212 00
Excavation, 235 cu. yds., at $2.50	587 50
Ordered by letter, September 28, 1905—	
Filling basement with concrete, 444 cu. yds., at $9.50	4,218 00
Bricks with cement mortar, 14,500, at $3 per M	43 50
Total	$11,196 00

AUDIT OFFICE, OTTAWA, May 12, 1908.

SIR,—A final estimate is in hand, for the work done by Jos. Couture on Lévis post office.

In view of the statements made in the House of Commons by Mr. Morin, M.P., to the effect that this post office building is unsafe, it would be well to have the chief architect enlarge his certificate so as to include this point explicitly.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

Lévis, P.Q., Public Building—Chief Architect's Report.

The main difference between the two statements of work contained in estimate 8 and the final estimate is in the measurements of additional concrete work and excavation.

Mr. Auger's services were dispensed with January 31, 1908.

As there were doubts as to the accuracy of the measurements reported by Mr. Auger, Mr. Mullarkey was directed to sink test pits and make a proper survey of the work done, and the amounts charged in the final estimate are based on measurements made on the work by Mr. Mullarkey in pursuance of instructions.

Items 1, 2, 3 and 8 in final estimate are not identical with, or similar to, any items in No. 8 estimate.

Item 1 is extra graining wood surface.

Items 2 and 4 are excavating holes and pumping same dry.

Item 3 is a lighting apparatus for the clock.

Item 8, for taking out broken stone below tide level to make way for concrete, and which was authorized by chief architect's letter, a copy of which accompanied final estimate.

The following items in final estimate correspond to items in estimate No. 8:—

Item 5 corresponds in a reduced form to item excavation 623 c. yds., at $2.50 = $1,557.50.

Item 6 corresponds in a reduced form to item concrete 210 c. yds., at $9.50 = $1,995.

Item 7 corresponds in a reduced form to item filling 413 c. yds., at $1.75 = $722.75.

Item 9 corresponds in a reduced form to item concrete 444 c. yds., at $9.50 = $4,218.

Item 10 corresponds in an increased form to items 221 c. yds., at $2.50 = $552.50, and 235 yds., at $2.50 = $587.50.

Item 11 corresponds in a reduced form to item filling 413 c. yds., at $1.75=$722.75,

Items 12 and 13 are identical with those in No. 8.

Item 14 corresponds in a reduced form with item concrete 337 c. yds., at $3.25 = $1,092.25.

The reason why the inaccuracy in Mr. Auger's measurements was not discovered before was that there were no grounds for suspicion of any such inaccuracy earlier—and as was customary before preparing the final estimate, every detail of the work was gone into.

The concrete charged for in items 6 and 9, was used to level up where inequalities in the surface of the rock occurred beneath the foundation walls and also to fill in under concrete floor where earth, which would have provided an unstable foundation under concrete floor, had to be removed and replaced with concrete. The terms of the contract provide for such additional work in cases where defective foundations occur.

The non-appearance of estimates monthly after estimate 8, was due to the fact that no adequate work was done nor materials supplied on the main contract during the interval, upon which an estimate could be based.

The building rests on the solid rock, does not wabble and is in no danger of falling down.

The building is strongly and well built and due deductions are made in the final estimate to cover the value of whatever is specified in the contract but is wanting in the building.

D. EWART, *Chief Architect.*

(Note by Auditor General: Upon receipt of this certificate the final estimate was released.)

St. John Harbour: Sand Point Slip.

AUDIT OFFICE, OTTAWA, May 15, 1908.

SIR,—Let me acknowledge receipt of your application No. 1077 for $25,000, in favour of Mr. G. S. Mayes, for dredging at berths Nos. 1, 2, 3 and 4, Sand Point, St. John harbour, between September 19 and December 31, 1907.

This $25,000 is part of a lump sum contract for $28,440 between Mr. Mayes and the City of St. John, which contract has been assumed by the Public Works Department.

Had the contract been let directly by the Public Works Department, an order in council would have been necessary for its ratification. The same authority is desirable, I think, for the less usual method actually adopted.

Please send a diagram showing the difference between this work and that previously paid for by the department. Also a certificate that the average price, ($28,440 ÷ 22,752) $1.25 a yard, is fair and just. A copy of the calculation of 22,752 yards would be acceptable.

Before we make payment to Mr. Mayes, he should execute a release of the City of St. John from all liability to him. Otherwise he might eventually be paid twice for the same work. And it would make the file more nearly complete, if we had a statement from the City of St. John that they have paid (and will pay) Mr. Mayes nothing on account.

I am, sir, your obedient servant,

Deputy Minister Public Works. J. FRASER, *A.G.*

Certified copy of a Report of the Committee of the Privy Council, approved by His Excellency the Governor General, on June 12, 1908.

On a memorandum dated June 2, 1908, from the Minister of Public Works, stating that the municipal authorities of St. John, New Brunswick, on September 18, 1907, have entered into an agreement with G. S. Mayes to perform certain dredging for the bulk sum of $28,400, at Sand Point slip (west St. John), on an area extending out 80 feet from the front of the wharfs at berths Nos. 1, 2, 3 and 4.

That the Dominion government have been and are still carrying on extensive dredging operations and other improvements to navigation in the harbour of West St. John, and this particular work having been ordered and carried out in the interests of the maritime trade at large, as are those executed by the Dominion government, its cost may be properly assumed by the Department of Public Works.

That an account covering the portion of the dredging found to be actually required and done by Mr. Mayes under the agreement above referred to aggregating

the sum total of $25,000, duly certified by the resident engineer of the Department of Public Works and by the engineer of the City of St. John, has been filed with the Department of Public Works.

The minister, therefore, recommends, in view of the foregoing, that authority be given to pay for the dredging work so performed, in accordance with the contract made by the City of St. John, the amount of the account above referred to, to wit: $25,000, this sum being payable out of the appropriation voted by parliament for the year 1907-8 for improvements in the harbour of St. John, New Brunswick.

The committee submit the same for approval.

RODOLPHE BOUDREAU, *C.P.C.*

Know all men by these presents that I, Gershon S. Mayes, contractor, of the city of St. John, in the province of New Brunswick, Dominion of Canada, in consideration of the payment to me of the sum of twenty-five thousand dollars, lawful money of Canada, by His Majesty the King, represented by the Honourable the Minister of Public Works of Canada, the receipt whereof is hereby acknowledged, in connection with dredging performed under contract dated the 18th day of September, A.D. 1907, between me, the undersigned, and the city of Saint John, N.B., at Sand Point, berths Nos. 1, 2, 3 and 4, on the western side of the harbour of Saint John, do hereby remise, release and for ever discharge the said city of St. John, N.B., of and from all manner of actions, causes of action, accounts, claims and demands whatsoever which in respect of the performance of ninety per cent of the dredging to be done under the said contract, against the city of St. John I ever had, now have or which my heirs, executors, administrators or assigns or any of them, hereafter can, shall or may have for and by reason of any cause, matter or thing whatsoever in respect to the performance of ninety per cent of the dredging to be done under said contract as aforesaid.

Dated at St. John, N.B., this ninth day of June, A.D. 1908.

G. S. MAYES. [SEAL.]

Signed and sealed in the presence of:
F. T. BELYEA.

Godefroi River: Overcasting.

PUBLIC WORKS DEPT., August 5, 1908.

SIR,—There has been recently pressed upon my attention a claim of Mr. Alphonse St. Pierre, of Three Rivers, amounting to $1,224, for certain dredging performed for this department in Godefroi river, during the months of August to October, 1905, and for which, owing to dispute, payment has never been made.

As the water was low at the time dredging was ordered, in order to perform the work it was necessary for the dredge to first make a cut by over-casting to permit of the scow being brought alongside the dredge. The contractor did this, and afterwards, by direction, also re-dredged and scowed away the over-cast material. The price to be paid for material scowed away was 15 cents, but as the over-casting did not cost the contractor as much, a reduction was made for that portion, it being considered that 75 per cent, or 11¼ cents per cubic yard would be a fair price.

The objection is made that the over-casting should not be paid for at all, as the necessity for it was one of the risks taken by the contractor in undertaking the work. The only clause applying is the usual one in our specification, viz.: 'that the material will be deposited as directed by the engineer.'

I am inclined to think the contractor may go so far as to claim full payment for the over-casting as well as the other dredging, but in any event, it would hardly seem fair to expect him to handle the material twice for one price, and he admitting that the first handling was at a lesser cost than the second, agreed to the reduced price of 11¼ cents fixed by the Department.

A fresh application is being made to your office for the payment of this account, which I hope you will see your way to authorize.

I am, sir, your obedient servant,

The Auditor General. J. B. HUNTER, *Act. D.M. P.W.*

AUDIT OFFICE, OTTAWA, September 5, 1908.

SIR,—Let me acknowledge receipt of your letter in further reference to the claim of Antoine St. Pierre for over-casting at Godefroi river.

The previous correspondence will be found at pages V—294 and V—295 of the Auditor General's Report for 1906-7. Our letter of May 8, 1907, does not appear to have been answered. The information therein asked for might perhaps tend to weaken my present conviction, that 'the contractor should know his locality, and takes the risk of his ignorance.'

I am, sir, your obedient servant,

The Deputy Minister Public Works. J. FRASER, *A.G.*

(Note by Auditor General, Dec. 22, 1908: This claim has not yet been paid.)

Sorel Deep Water Wharf: Extra Silting not paid.

(Following the discussions in previous Auditor General's Reports, at pages V—379 to 381 of 1905-6, and at page V—296 of 1906-7.)

OTTAWA, January 11, 1908.

Re *McAuliff, Poupore & Weddell's Sorel Wharf Contract.*

DEAR SIR,—In connection with the above contract a claim was preferred by our clients which was investigated and reported upon by the resident engineer in charge of the work and the chief engineer of your department. As a result of such investigation and report the payment of a part of the claim, namely, the sum of $34,554.50, was recommended by the chief engineer in a report dated April 1, 1905. Of this amount we are informed that authority was recently given to pay $18,763. There remains, under the chief engineer's report, an unpaid balance of $15,791.50, regarding which we are instructed to apply for payment on the grounds hereinafter stated.

We are informed that the reason advanced by the Auditor General for being unable to approve the recommendation for payment of the last-mentioned amount is, that unless the contract time was extended to suit the government, the silting, in respect of which this unpaid balance is claimed, might have been foreseen, and that in such event it would not be a matter for additional compensation.

Dealing first with the extension of time, we beg to point out that such extension was made to suit the government, and not the contractors. Each extension was due to the fact that additional work was ordered, and the carrying out of such additional work, as directed by the department from time to time, prolonged the completion of the contract much beyond the original contract term. Reference to the files in the

department relating to this contract will disclose all the particulars connected with the additional work so ordered. Some of this additional work was as follows:—

1. A system of tie-rods was designed for the purpose of strengthening a part of the work as originally laid out. The contractors were furnished with a plan of this tie-rod system in December, 1902, and negotiations as to the cost of this additional work continued throughout the winter of 1903. An agreement, supplementary to the original contract (and therefore superseding it as to time), was entered into with the contractors in May, 1903, for doing this additional work at a cost of $6,397.50 over and above the bulk sum in the original contract.

2. A heavier mode of construction for the northeast end of the wharf was decided upon in January, 1903, and the additional work thereby entailed was afterwards carried out by the contractors.

3. A further agreement was entered into with the contractors in August, 1903, for raising and removing a sunken barge at Sorel.

4. In October, 1903, the resident engineer ascertained that additional dredging in the vicinity of the new wharf would be necessary, and this work also was authorized by the department and performed by the contractors.

5. In July, 1904, it was decided to build a retaining wall at the eastern end of the wharf and a new agreement was thereupon entered into with the contractors for this additional work which was completed the same season.

The foregoing partial enumeration of additional work performed will, we respectfully submit, demonstrate that the extension of time rendered necessary by such work was a matter for which the government, and not the contractors, must accept responsibility. As already stated, full particulars regarding all the additional work may be obtained by referring to the departmental files.

It follows from what we have said that the silting in of the dredged area that was constantly going on while the additional work was in progress could not have been foreseen by the contractors and that it is, therefore, a matter for additional compensation. Moreover, it must be borne in mind that there were extraordinary and unprecedented freshets in the Richelieu river in December, 1901, which have an important bearing on the item under discussion. The violence of these freshets was such that dams were carried away, boats and other river craft were torn from their moorings and several vessels were sunk. Ice covering a stretch of 12 miles up stream was piled up in the last mile of the Richelieu river before it enters the St. Lawrence, and after the disaster this mass of ice was found to be upwards of 15 feet deep. One result of the formation of this ice gorge and consequent choking of the channel was a scouring action of such tremendous violence that the flood carried down with it an enormous quantity of material which was deposited at the outlet of the Richelieu into the St. Lawrence. This was the exact place at which the contractors' dredging work was carried on, and it will not be pretended that they could have foreseen such an unusual occurrence as the one just referred to.

In further support of the contractors' claim to be paid the balance of the amount recommended for payment by the chief engineer, we beg to point out that our clients frequently asserted their right to be paid for all material that they had to handle a second time, as well as for all material that settled in the dredged area after they had excavated down to grade. During the progress of the work they wrote the resident engineer as follows:—

'MONTREAL, June 29, 1903.

'L. G. PAPINEAU, Esq., C.E., Engineer in Charge.

'DEAR SIR,—From a report we have received from Capt. J. J. Manley, our dredging superintendent at Sorel, a copy of which we inclose herewith, we find that the Richelieu river opposite the pile wharf, has filled in from three to five feet, since you took

soundings there last December. If you wish to verify our soundings, we would like you to do so as soon as possible, as we intend to start dredging there in a very short time, and we shall hold the government responsible for all the material that will have to be removed the second time. Yours truly,

'POUPORE, MCAULIFF & Co., per W. J. POUPORE, *Manager.*'

The position taken in the foregoing communication was re-asserted a month later in a letter to the resident engineer in these terms:—

'MONTREAL, July 21, 1903.

'L. G. PAPINEAU, Esq., C.E., Resident Engineer, &c.

'MY DEAR SIR,—I inclose you my partner's, Mr. Weddell's, letter. I presume you will understand what it is he refers to, as you and he were on the work together last week. There cannot be any question of doubt in my mind as to the liability of the government in paying for material which settled into the cut after it was found last year to be down to grade. However, I suppose this matter will have to be brought before the minister and chief engineer for adjustment. Yours sincerely,

'W. J. POUPORE.'

Having regard to the above correspondence and to the preceding facts, we beg to submit that our clients are entitled to be paid not only the item of $15,791.50 contained in the chief engineer's report, but also the further item mentioned therein of $11,850. It will be recalled that the chief engineer reported that the contractors had actually dredged an additional depth of 18 inches, but his recommendation for payment of the work covered an allowance of only 9 inches. Dealing with the remaining 9 inches of dredged material, he says:—

'If this additional depth of 9 inches is allowed, the contractors would be entitled to an additional quantity of 47,400 cubic yards, in situ, or $11,850 at the schedule price of 25 cents per cubic yard in situ of their contract.'

The reasoning that sustains our clients' right to the item of $15,791.50 applies with equal force to the item of $11,850, and in our opinion they are entitled to both amounts.

In view of all the circumstances of the case we therefore beg to request that you will have speedy instructions given to pay our clients the said sums of $15,791.50 and $11,850, respectively.

Yours very truly,

The Minister of Public Works. MURPHY & FISHER.

CHIEF ENGINEER'S OFFICE, OTTAWA, February 5, 1908.

SIR,—In file No. 312,982, Messrs. Murphy & Fisher claim a balance of $15,791.50, as being due to Messrs. McAuliff, Poupore & Weddell under their contract for the building of the government wharf at Sorel.

As regards this first item of their claim, I have the honour to state that the allegations contained in the letter are absolutely accurate, as the completion of the wharf was certainly delayed by the calls that were made upon the contractors for the performance of the additional works enumerated in the letter, items one to five, inclusively. I, therefore, again beg to recommend that this sum of $15,791.50 be paid to the contractors.

As regards the second item of $11,850 for the additional depth of 9 inches dredged by the contractors, I have already stated in my report of the first April, 1905, that the additional depth given by the contractors 'would delay the time when further dredging

would be required, to prevent the dredged area from silting in above the depth of 30 feet called for by the contract.' If this is taken into consideration, and also the fact that the contractors accordingly performed the work, the contractors would certainly be entitled to the amount they claim for this additional work, and I am of opinion that in all fairness, such allowance should be made to them.

File No. 312,982, and four others are herewith inclosed.

I am, sir, your obedient servant,

EUGENE LAFLEUR, *Chief Engineer.*

AUDIT OFFICE, OTTAWA, February 9, 1908.

SIR,—I have read carefully the recent as well as the former correspondence on the subject of 'Sorel deep water wharf,' and now offer the following remarks thereon:

Extracts from Specification.

Three extracts from the specification have a bearing on the points now under discussion, and are here quoted for convenient reference.

Section 52, page 10 reads: 'Dredging shall be done on the area coloured red on general plan, sheet 1, to obtain and leave on the completion of the work a depth of 30 feet below extreme low water level, which level shall be given by the engineer-in-charge, and the bottom of the area so dredged must be left smooth, and free from ridges, lumps or inequalities.'

By section 63, page 13: 'The price stated by the contractor in his tender..... will be held as rigidly inclusive of and covering all failures, accidents, contingencies, ... and all damages that may be done to the work..... by storms, scourings, settlement, ice, fire, or any other cause whatever, up to its completion and acceptance by the engineer.'

By section 80, page 15: 'The works.....must be proceeded with in such a manner as to insure their completion within twelve months from the date of the contract.' The contract was signed June 25, 1901.

Claims Already paid to Contractors.

1. Extra dredging, on account of slopes of 4 to 1, instead of 2 to 1, as expected: 27,652 cubic yards, at 25 cents = $6,913.

2. Extra dredging, to 18 inches below 30-foot line: one-half allowed, namely, 9 inches: 47,400 cubic yards, at 25 cents = $11,850.

Claims now urged by Contractors.

1. Extra dredging, on account of material silted in by Richelieu river: 63,166 cubic yards, at 25 cents = $15,791.50.

2. Extra dredging, to 18 inches below 30-foot line, the half previously disallowed, namely, 9 inches: 47,400 cubic yards, at 25 cents = $11,850.

Extra Material silted-in by River Richelieu.

The contractor's arguments for this claim may be separated into two groups: those connected with the unusual freshets on the Richelieu in December, 1901, and those based on extended duration of the work, as a result of extras having been added to the specification at later dates.

Freshets of December, 1901.

As far as executive and audit duties are concerned, the events of December, 1901, are covered by section 63 of the specification, previously quoted. The contractors took all risks, certainly up to June 25, 1902, if not after that date. The department has no authority to certify payment; nor has the Audit Office power to approve it.

If it is considered that the circumstances were so unusual as to form a moral obligation to pay, a special vote will be needed, as in the case of Messrs. Battle & Conlon, at Goderich. (See report of 1905-6, page V—381.)

Silting after June 25, 1902.

The work of re-dredging was performed in July, 1903, so that the silting of the spring of 1903 is the only one to be considered under this head.

The contractors send in a list of five items of extra work which (they claim) delayed completion, and gave increased time for silting. But only items 1 and 2, of January and May, 1903, are germane. Items 3, 4 and 5, of August, 1903, October, 1903, and July, 1904, respectively, are of too late date to have had any effect in this direction.

Items 1 and 2, however, are shut out for another reason, namely, the fact that prices were agreed upon for them. These prices, of course, like the original tender for the main work, covered all possibilities of contingent or reversionary damages of every kind. If the extras caused the work to last two years instead of one, the second year's silting must have been foreseen; and the prices bid for the extra work were made higher than they otherwise would have been, in order to guard against this risk.

Second nine inches of extra depth: 47,400 cubic yards.

Resident Engineer Papineau, under date of February 11, 1904, says: 'Any experienced dredge man would expect to have to remove a certain quantity of material below grade-line, so as to insure full depth everywhere;' and he includes nine inches of extra depth, or 47,400 cubic yards, in the 'probable quantity of excavation *in situ* required by the contract.'

Against the other nine inches, he reasons that the contractors 'could have kept nearer the exact line of 30 feet depth.'

Chief Engineer Lafleur, in his report of April 1, 1905, says: 'It is always understood that a certain allowance must be made by the contractors for dredging to a greater depth than that required when the work is completed, in order to provide for any silting-in that might occur during the progress of the works. I may, however, say that the additional depth of 18 inches over the whole area is certainly more than the contractors would have had to make in order to leave the finished work at the required depth of 30 feet at extreme low water.'

There is no claim made that the extra 18 inches was dredged under instructions from the engineer, or for any other motive than to assure the contractors that they were fulfilling section 52 of the specification, and leaving 'on the completion of the work a depth of 30 feet below extreme low water level.'

The contractors appear to have received fair treatment, by being paid for nine inches below the specified level.

I am, sir, your obedient servant,

The Act. Dep. Min., Public Works. J. FRASER, *A.G.*

Kaministiquia River: Great Lakes Dredging Company.

AUDIT OFFICE, OTTAWA, January 27, 1908.

SIR,—Let me call your attention to application No. 475, of October 2, 1907, for $5,625.72 in favour of the Great Lakes Dredging Company for 'dredging in Kaministiquia river above elevator D,' in June, July and September, 1906.

Resident Engineer Temple reports, under date of April 20, 1907, as follows: 'Last year permission was granted to the Great Lakes Dredging Company to employ one or more of their dredges on private work, and a contract was entered into between the said company and the Canadian Northern Coal and Ore Dock Company for filling their coal wharf at Port Arthur. As the Dredge Company was at liberty to take the material from whatever places suited them best, I did not consider it my duty to supervise the work, as they would be paid for what they dredged by the Coal Dock Company. The greater part of the material was taken from the Kaministiquia river at the first bend above elevator D. . . . . When the dredging was completed, Mr. Bowman asked that the Great Lakes Dredging Company be allowed for what material they had removed, in so far as the channel of the river had been benefited. This demand appeared reasonable. . . . . They have removed 46,851 cubic yards (scow measurement), allowing only down to the depth of 22 feet below zero. I consider in equity the contractors are entitled to this amount.'

In the absence of any specific information as to the rate paid by the Canadian Northern Dock Company to the Great Lakes Dredging Company for filling at their coal wharf in Port Arthur, it may be assumed that that price was full and sufficient remuneration.

If so, the dealings stand at present thus: The C.N.D. Co. has its wharf filled, and has paid for it; The G.L.D. Co. has filled the C.N.D. wharf, and has been paid for it; the Dominion has gained a better channel in the Kaministiquia river.

If $5,625.72 is now paid by the Public Works Department to the Great Lakes Dredging Company, the dealings will stand thus: C.N.D. Co. unchanged; G.L.D. Co. does one job of work, and gets paid twice for it; the Dominion pays for dredging which it neither ordered nor inspected.

Under these circumstances, I cannot see that the Dominion government is under any obligation to pay for this dredging.

I am, sir, your obedient servant,

The Act. Dep. Min., Public Works. J. FRASER, *A.G.*

(Note by Auditor General: This application was withdrawn by the department for further consideration.)

Hamilton Wharf: A. A. McDonald.

PUBLIC WORKS DEPT., OTTAWA, January 19, 1908.

DEAR SIR,—With reference to attached report from you, dated December 28, with respect to claim for extras by Mr. A. A. McDonald, contractor for the construction of the revetment wall at Hamilton, Ont., I do not exactly comprehend the position Mr. Engineer-in-charge Sing takes in this matter.

I note he says that none of the extras as charged for by the contractor were ordered by him, with certain exceptions, but that none the less the work for which he is claiming payment was necessary to be done, and the prices he is charging are fair and reasonable. Now, what I cannot understand is that with an inspector daily on the work, supposed to keep in close touch with the engineer-in-charge, under whose supervision and direction the work was being carried on, how the contractor could

have done work to the extent Mr. Sing states he has without his approval. I should think it was the place of the inspector or of Mr. Sing, through his inspector, to stop such work if it was not necessary, or if necessary to approve of and order it. There seems to me to be a tacit approval or order given from the mere fact that the contractor was allowed by the inspector and the resident engineer to proceed.

Will you kindly communicate with Mr. Sing, call his attention to this, and see what he has to say.

The Chief Engineer, Public Works. J. B. HUNTER, *Act. Dep. Min.*

TORONTO, February 4, 1908.

SIR,—I beg respectfully to acknowledge the receipt of your letter No. 332, dated the 20th ult., inclosing memo. from the acting deputy minister, referring to my report on the claim for extras submitted by Mr. A. A. McDonald in connection with the construction of the revetment wall at Hamilton, and asking for further explanations in the matter, and you ask me to let you have a further report giving the explanation required.

In obedience to your instructions, I would say that all the items included in Mr. McDonald's claim were ordered by me excepting three. The total cost of those ordered amounts to $725.31, while the remaining three items amount to $1,413.75, comprising 865 cubic yards stone filling, at $1.25 per yard, amounting to $1,081.25, and 5½ feet extra length of wall, at $58 per foot, amounting to $319, and one extra nigger head costing $13.75.

The original contract called for 1,230 feet of revetment wall and the line of same was duly laid out by one of my engineers, but the inspector, in spacing the pile bents, has somehow added the extra 5½ feet.

With regard to the extra 865 yards of stone filling, I do not think I can add anything to the statement made to you in my report of December 27 last, any more than to say that it was essential to the well-being of the work, and had I not thought so I would certainly have stopped it. From careful measurement of the work, I have ascertained that the quantity of extra stone filling charged for is in the work and was placed there by the contractor, and as stated in my previous report, I have no hesitation in stating that the account is fair and reasonable and that the work has been performed in a most substantial and workmanlike manner.

Yours obediently,

The Chief Engineer, Public Works. J. G. SING, *Engineer-in-charge.*

AUDIT OFFICE, OTTAWA, March 11, 1908.

SIR,—Let me acknowledge receipt of your application No. 892 for $2,131.31, in favour of Mr. A. A. McDonald, of Hamilton, for extra work on steel wharf at that place.

The resident engineer, Mr. J. G. Sing, reports that most of the extras were not ordered by him.

Since written orders for extras are a necessary condition of the contractor's right to payment (under section 5 of the contract), only the items ordered by Mr. Sing can be recognized at this stage.

If thought expedient, an order in council might be obtained, to waive this limitation of the contract in the present instance.

The subject has been discussed several times before, in other cases, and in the same line.

I am, sir, your obedient servant,

The Act. Dep. Min., Public Works. FREDERICK HAYTER *for A.G.*

PUBLIC WORKS DEPT., OTTAWA, March 14, 1908.

SIR,—Replying to your favour of the 11th instant, with inclosures herewith returned, I beg to call your attention to some correspondence which I had with the chief engineer of the department in reference to the point which you now raise. I am sending you copies of same and trust you will see your way, after considering them, to pass the application.

Yours very truly,

The Auditor General. J. B. HUNTER, *Act. D.M.*

AUDIT OFFICE, OTTAWA, March 26, 1908.

SIR,—Let me acknowledge receipt of your letter of March 14, 1908, inclosing copies of further correspondence on the subject of Mr. A. A. McDonald's claim for extras on his contract for steel wharf at Hamilton.

With reference to the item of $1,081.25 for 'extra stone filling, 865 cubic yards, at $1.25,' please send me a diagram showing separately the contract-filling prescribed by section 26 of the specification, and the additional filling now claimed as an extra.

Mr. Sing holds that the additional filling 'was essential to the well-being of the work.' If so, why was it not specified? Does the chief engineer agree that the original plan was defective in this respect?

Re 'extra length of wharf, 5½ feet, at $58 = $319.' Mr. Sing says 'the original contract called for 1,230 feet of revetment wall, and the line of same was duly laid out by one of my engineers; but the inspector, in spacing the pile-bents, has somehow added the extra 5½ feet.' There does not appear to be any mention of the length of 1,230 feet in the specification. Please let me see the plan, with a note showing how this distance was calculated, and how the 5½ feet has accrued.

What progress has been made towards obtaining an order in council for payment of these extras?

I am, sir, your obedient servant,

The Act. Dep. Min., Public Works. J. FRASER, *A.G.*

TORONTO, April 21, 1908.

SIR,—I respectfully acknowledge the receipt of your letter No. 1772, inclosing four departmental files regarding the claim made by Mr. A. A. McDonald in connection with the contract for the construction of the revetment wall at Hamilton, Ontario, and you direct my attention to a letter of the Auditor General in file No. 316374, asking for a plan and certain information as to the method of calculating the amount of extras. You request me to let you have the plan and information as soon as possible.

In obedience to your instructions, I inclose herewith plan showing coloured in red the layer of stone varying in thickness from 9 to 12 inches on revetment wall extending the entire length thereof. The plan shows clearly where the stone was placed and I hope will be a satisfactory answer to the Auditor General's question in paragraph 2 of his letter of the 26th ult., to the acting deputy minister.

'*Re* extra length of wharf.' This is also shown coloured red on plan. The original length, 1,230 feet, was marked on the contract plan, a copy of which I inclose.

The inspector in spacing the bents measured from centre to centre, and as the concrete piers on the pile-bents were 36 inches in thickness at the bottom and 40 inches at the top, there would be a projection of 20 inches on each end pier of the revetment wall which would increase its length 40 inches. The above will appear perfectly plain upon reference to a copy of the contract plan enclosed. The second opening

left in the wall at the request of the council and city engineer for the Cathrine Street sewer, is 12 inches greater than the space between the other bent centres. This adds another 12 inches, making in all 52 inches. The remaining 14 inches of the extra 5½ feet can only be accounted for by a slight variation that might easily occur in spacing and constructing the bents.

With regard to the last query of the Auditor, in paragraph 3 of his letter, the plan was in no way defective nor is the work as constructed, and as I have previously stated, it is one of the most substantial and handsome works that has ever been constructed on the great lakes.

Yours obediently,

The Chief Engineer, Public Works. J. G. SING, *Engineer-in-charge.*

AUDIT OFFICE, OTTAWA, September 9, 1908.

SIR,—In further discussion of the claim of Mr. A. A. McDonald for $2,131.31 for extra work at Hamilton steel wharf.

The items of the claim are as follows:—

Catharine St. sewer opening, piles, stringers, braces....	$ 195 36
Steel piling, closing up Catharine and Ferguson St. sewers.. .. .. .

Extra Length of Wharf 5½ Feet, at $58.

Of the unexpected extra length, four feet is shown to be made up by the top of the wharf projecting out over the piling. As the pile-bents were to be 10 feet apart, and the wharf 1,230 feet long, it can be inferred that the contract price applies to the work between the extreme piles. Now, the rate of $58 per foot is obtained by dividing $71,000 (the tender price) by 1,230. This does not appear logical, as the two feet overtopping at each end are not homogeneous with the rest, having no piling and stone filling under them. Would it not be better to analyse and pay for them according to the material actually in them?

I am, sir, your obedient servant,

The Dep. Min., Public Works. FREDERICK HAYTER, *for A.G.*

Owen Sound: Dredging at C.P.R. Slip.

(Following Discussion at Pages V—302 to V—306 of 1906-7.)

PUBLIC WORKS DEPT., OTTAWA, October 28, 1907.

SIR,—With reference to your letter of the 16th instant, concerning dredging in the C. P. R. slip at Owen Sound, I beg to state in reply to your query that the fact that the slip in question is the property of the Canadian Pacific Railway Company does not exclude it from the advantages of public dredging should the same be considered necessary. In many of the harbours of the Dominion, quite a quantity of dredging has been done in years past in order to provide easy access to wharfs which might be, in a way, called private property, they being owned by corporations which entirely utilize the accommodation afforded. That does not mean that, where private enterprise has enabled a corporation to provide for itself wharf accommodation without the intervention of the state, this mark of enterprise on the part of said corporation should immediately debar it from receiving the benefits of any improvements which it is in the province of the state to provide for the advantage of trade and commerce. Such a principle has never, that I know, been held to obtain in connection with the improvements of navigation by means of dredging, and many are the enterprises which would have been very much reduced in their utility if the state had not provided this form of improvement in order to assist the transaction of the general trade and commerce in which those private corporations were engaged.

It is quite clear that in many cases the assistance given by dredging to provide easier access to works privately owned gives a greater encouragement to the general trade than work performed at places which are known specifically to be a public property.

I am, sir, yours very truly,

The Auditor General. A. GOBEIL, *D.M.*

AUDIT OFFICE, OTTAWA, December 14, 1907.

SIR,—Let me call your attention to the unfinished discussion concerning Mr. A. F. Bowman's claim for extra cost of dredging in the C. P. R. slip at Owen Sound.

Your letter of October 28 dealt only with mine of October 16; but my previous letter of September 12 is still unanswered.

It is not possible to discuss fully yours of October 28 without the information asked for in mine of September 12.

I am, sir, your obedient servant,

The Deputy Minister, Public Works. J. FRASER, *A.G.*

(Note by Auditor General, December 22, 1908: This claim has not yet been paid.)

Dredging: Calculations of Volume.

AUDIT OFFICE, OTTAWA, December 16, 1907.

SIR,—Let me acknowledge receipt of your application No. 708, for $3,598.65, in favour of the General Construction Company, for dredging at Hay Island, Berthierville, in October, 1906, 21,810 yards, at 16½ cents.

The dredging returns may be summarized as follows:—

October 1-5.—Width of cuts, 20 feet; depth of cuts, 9 feet; total distance advanced, 325 feet.

October 7-31.—Width of cuts, 18 feet; depth of cuts, 9 feet; total distance advanced, 1,550 feet.

The first item gives a volume *in situ* of 2,167 cubic yards, the second item gives a volume *in situ* of 9,300 cubic yards; total 11,467 cubic yards.

The allowance for (say) one-to-one slopes varies of course with the shape of the area dredged. If a channel of 6 yards wide, the one-to-one slope allowance is 5,823 cubic yards, and this gives a total cavity of 17,290 cubic yards.

To produce the scow-volume of 21,810 cubic yards, as charged in the voucher, 17,290 would need to be multiplied by 1·26, as an expansion-factor.

Since the expansion-factor germane to the present transaction can only be identified and approved by knowing the contour of the area dredged, please let me have a diagram showing this contour within fair limits of accuracy.

A similar plan will be needed with each month's dredging estimates in future.

If the present application is divided, $2,000 will be passed on account.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, December 20, 1907.

SIR,—Let me acknowledge receipt of your application No. 766 for $3,630 in favour of the General Construction Company, for November, dredging in Rivière Jésus.

By calculations similar to those in a previous letter about the same company's accounts, if the whole cut is a channel 26 or 27 feet wide, the expansion-factor between material *in situ* and material on the scow is about 1·53.

There should be in each case a diagram to show the contour of the area dredged, with a calculation based thereon to exhibit the average expansion-factor for the month; also a statement from an engineer that this factor is, in his judgment, reasonable.

Please describe in full detail the various steps of the departmental examination of these dredging vouchers, up to the time of their approval by the chief engineer.

A payment of $2,500 on account of the present estimate would be passed in the meantime.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

CHIEF ENGINEER'S OFFICE, OTTAWA, December 24, 1907.

SIR,—In file 311074, herewith inclosed, the Auditor General refers to the application for $3,598.65 in favour of the General Construction Company, for dredging at Hay Island, Berthier, P.Q., and requests a diagram of area dredged. He further states that some plans will be needed with each month's dredging estimates in future.

In reply, I may say that I have no sketch of the work performed by the company at Berthier, nor, in fact, of any dredging performed by any of the firms with whom contracts have been entered into for dredging purposes. Therefore, the sketches asked for by the Auditor General cannot be produced.

Moreover, I would say that if the Auditor General adheres to his decision to delay all payments for dredging until such sketches are supplied, the department will have to furnish me with a complete staff of engineers, assistants and draftsmen, larger than the one I have at present in the department, in order to carry out the work. I may also say that the necessary funds to pay the working expenses of this staff will be as large, if not greater, than the amount required to pay the salaries of my present staff.

I may add that the system arrived at for computing the actual work performed by all the contract dredges was arrived at after a number of trials of other ways, which trials have proved more or less embarrassing. As a last resort, the department decided to call for tenders per cubic yard, scow measurement, which was deemed to be the most fair and just manner, both to the department and to contractors. Therefore, the tenders now call for a price per cubic yard, scow measurement, which is easily computed by the inspectors, whose sole duty is to see that the scows do not leave the dredge before they are filled up to their capacity. This, it was believed, was the most reasonable way of computing quantities, as it did away with the calculations of expansion due to the difference between measurement *in situ* and scow measurement.

It is reasonable to believe that our inspectors are honest men and reliable, and that they would not return any larger quantities of material than those actually removed by the contractors. This being the case, the only thing the department has to do is to pay for the quantities removed according to the returns certified to by the inspectors, by the captains of the dredge, by the engineer-in-charge and by myself.

To ask for a monthly sketch showing progress of operations is, in my opinion, absolutely unreasonable, and I may say, with the knowledge I have of such works, that it would be pretty well nigh impossible to furnish. I, therefore, believe that if this matter, as well as some others which have already been referred to me, were fully discussed with the Auditor General, he would see his way clear, in all fairness, to paying all amounts due to our dredging contractors without any further delay.

I am, sir, your obedient servant,

The Dep. Min., Public Works. EUGENE D. LAFLEUR, *Chief Engineer.*

AUDIT OFFICE, OTTAWA, February 5, 1908.

SIR,—Let me acknowledge receipt of the secretary's communication of January 28, inclosing Chief Engineer Lafleur's letter of December 24, on the subject of the General Construction Company's accounts for dredging at Berthierville and elsewhere.

Previous Estimates for Dredging.

The printed form for 'weekly returns of dredging' contains three columns, showing, respectively, the depth, width, and length of the cut. These figures, if collected with reasonable care, should give a close approximation to the volume of the cavity made in the river bed, and a valuable check on the records of scow measurement.

It has always been inferred in this office, that the department had confidence in these figures, and used them (in conjunction with plans) when examining and certifying the claims for scow measurement. It was on this supposition of departmental thoroughness, that the successive progress estimates were allowed to pass.

Varying Ratios between Loosened and Solid Earth.

To verify the efficacy of such a departmental examination, an attempt was recently made in the Audit Office, to compare the calculated volume of excavation (as deduced from the dredging returns) with the scow measurement of earth towed away (as claimed by the vouchers). Allowing in the meantime for one-to-one slopes, until a more appropriate slant should be named by some engineer; three different accounts gave three widely varying ratios between excavated and solid earth, the expansion-factors being respectively ·97, 1·53 and 2·52. The last ratio, for example (at St. Pierre les Becquets), means that (if the dredging returns are correct, and the slope allowance fairly close) each yard of solid earth became two and a half yards in the scow.

In several letters the department was asked to discuss the subject of these variations in expansion-factors for different places and materials.

Dredging Returns now called Defective.

Without taking up this part of the subject, the department claims (December 13) that the depths and widths given in the returns are not accurate (thus destroying any conclusions drawn from them); and (December 24) that a large staff of engineers will be necessary to prepare plans, if these are insisted on.

Moreover, the chief engineer says: 'It is reasonable to believe that our inspectors are honest men and reliable, and that they would not return any larger quantities than those actually removed by the contractors.'

Inspectors can take Soundings.

Since the inspector's 'sole duty is to see that the scows do not leave the dredge before they are filled up to their capacity,' and since the number of scows filled daily seems to be generally less than ten, this would give the inspector time enough to take soundings with a pole, and keep a record of the river bottom which would be near enough to accuracy for the purpose now required, namely, testing the total of the scow measurement.

If the chief engineer will re-examine my letters, he will find that in no case was a request made for a 'plan,' which would probably mean a scaled plan from a draftsman. What was asked for was a 'diagram,' in one instance explicitly qualified as 'within fair limits of accuracy.' Such a diagram could be prepared by any intelligent inspector, with the aid of a rough outline of the river, a sounding-pole, and a row-boat. It need not be drawn to scale, when nothing is scaled from it.

If this were done, a large part of the defect would be remedied of which the chief engineer complains in the words 'I have no sketch of any of the dredging performed by any of the firms with whom contracts have been entered into for dredging purposes.'

Reliability of Inspectors.

We are quite ready to admit that a large proportion of the dredging inspectors are (as the chief engineer claims for all) 'honest and reliable,' just as a large proportion of the rest of the government service possess the same attributes. But occasional lapses from reliability, such as that of Mr. Eastwood at Matchedash Bay, make it necessary to keep up the rigour of the departmental control.

It will be remembered that Mr. Eastwood did part of his inspection from an office window on the neighbouring store, and part by proxy. See Report of Public Accounts Committee for session of 1906-7.

Modification of Present System.

I would be pleased to learn that the department is prepared to take soundings and make diagrams as described above, and thus obtain figures which may be used in checking the scow measurements. Also that the department will work out these calculations, and attach them to the progress estimates, with certificates of approval of the results.

Upon receipt of an assurance that the system will be brought up to these requirements, as many as possible of the delayed accounts will be released.

The larger expansion-factors will still need explanation.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, February 12, 1908.

SIR,—I beg to acknowledge receipt of your favour of the 5th instant in further reference to communication from this department under date January 28, on the subject of the General Construction Company's accounts for dredging at Berthierville and elsewhere. The representations contained in your letter would seem to call for the very careful consideration of the department and are being brought under the immediate and special notice of the chief engineer, in order that further explanation may be had, which will be furnished as soon as received.

Yours very truly,

The Auditor General. J. B. HUNTER, *Act. D.M.*

PUBLIC WORKS DEPT., OTTAWA, February 15, 1908.

SIR,—With further reference to your letter of the 5th instant, in regard to application for payment to the St. Lawrence and Great Lakes Dredging Company for dredging at Rivière du Loup (en Haut) and St. Pierre les Becquets, I beg to state that the matter has again received the careful consideration of the chief engineer, who remains of opinion that his certificate as to the reasonableness of the expansion-factors to which you call attention is quite correct and proper.

He points out that it is evident, as you remark yourself, that the bottom of the river would never be perfectly level and that therefore the face to be dredged would never be the same the whole length of the cut, from the fact that the bed of the river varies in profile as does the surrounding land. The chief engineer also points out that in the same cut, say, for a distance of 1,000 feet in length, the depth of material to be removed to procure a channel of, say, 10 feet depth, may vary from six inches to seven or eight and perhaps nine feet, and further, that when passing through shoals the depth of material to be removed is the full depth of water which it is proposed to obtain plus whatever the height of the shoals above that level.

The chief engineer concludes, therefore, that it is impossible to calculate the actual quantity of dredging performed by multiplying the area of the section dredged by the length of the cut, as in some cases the result would be far greater than the actual returns would show, while in others it would, of course, be less. Under these conditions, it is quite understandable that the expansion-factors to which attention has been called may be quite well within the mark.

I may add that the matter of ensuring accurate returns in regard to dredging is one that has received the most careful consideration of the department and is being

specially studied at the present moment, and while apparent inaccuracies have presented themselves, which on investigation have disappeared, I am sure from the attention the matter is having at present, that a solution will be found affording as absolute a guarantee of accuracy as it is possible to obtain in work of this class, which must necessarily be performed under varying conditions.

I trust that with these explanations you will see your way to release the accounts for payment of which application is being made.

I am, sir, your obedient servant,

The Auditor General. J. B. HUNTER, *Act. D.M.*

AUDIT OFFICE, OTTAWA, March 12, 1908.

SIR,—Let me acknowledge receipt of your communication of February 15, in further discussion of the methods of examining and verifying returns of dredging.

My letter of February 5, commented on the unsatisfactory condition of these returns as now rendered; and it went on to suggest that (in the absence of more rigorous measurements) the inspector should take soundings with a boat and a pole, ahead of the dredge. Such soundings, (if carefully taken,) while they might not be accurate enough as a basis of payment, would furnish data for an approximately close verification of the scow measurement.

In your last letter the chief engineer is quoted as saying that 'the bottom of the river would never be perfectly level, and therefore the face to be dredged would never be the same the whole length of the cut, from the fact that the bed of the river varies in profile as does the surrounding land.'

The river line between any two points, being on the Hydraulic Slope, is apt to have much less irregularity than the surrounding land; and the main action of the current probably tends toward equalizing the depth.

The progress estimates for Dredging now in hand show an average daily advance of about 35 feet, which may, I suppose, be taken as a usual distance for this kind of work. From the inspector's report of preliminary soundings, the actual volume of this advance could be closely approximated, by dividing the distance up into, say, 3 or 4 parts.

Pole-sounding from a boat is not offered as an ideal solution of this problem. But it is better than the illusory system of arbitrary figures which it replaces. If the chief engineer can offer something better, all right. Otherwise, the sounding might be tried as an experiment, and let it develop its own defects.

My letter of February 5 ended as follows: 'Upon receipt of an assurance that the system will be brought up to these requirements, as many as possible of the delayed accounts will be released.' The offer is still open.

I am, sir, your obedient servant,

The Act. Dep Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, March 19, 1908.

SIR,—I beg to acknowledge receipt of your favour of the 12th inst., in reference to payment of certain dredging accounts. The only point between us now seems to be that you insist that this department should assure you that a system of pole-sounding from a boat will be instituted in connection with our dredging operations.

In my letter of the 15th ultimo, I stated that the matter of improving our system of checking and overseeing dredging operations was being specially studied, and as a result it is the intention of the department to make changes looking to as great a degree of accuracy as possible being obtained, but whether your suggestion in regard to pole-sounding can be utilized, I am not prepared to state at the present moment, as what may be considered a still more efficient check may be the result of the attention which is at present being given this matter, but what I would like to impress upon you is that the department is seeking by every means in its power to obtain proper work and good returns for money paid, and while I am pleased, and will always be, to receive suggestions where improvements may be made, still it seems to me that the choice of the methods finally adopted rests with this department and its responsible head as, naturally, by experience it is reasonable to assume that any improvements can best be worked out by them. You have my full and free assurance that every care and precaution to see that this class of work is properly, efficiently and economically performed, will be taken by the department, whatever methods it may be considered most advisable to adopt to that end.

I hope you will now see your way to release the two payments upon which the discussion arose, namely, St. Pierre les Becquets and Rivière du Loup-en-haut.

I am, sir, yours very truly,

The Auditor General. J. B. HUNTER, *Act. D.M.*

AUDIT OFFICE, OTTAWA, March 23, 1908.

SIR,—Let me acknowledge receipt of your letter of March 19, on the subject of verification of claims for dredging.

I note with pleasure that a still more efficient check than pole-sounding by the inspector may be the result of the attention which is at present being given to this matter.

The delayed applications will be now certified.

I am, sir, your obedient servant,

The Act. Dep. Min., Public Works. J. FRASER, *A.G.*

Tug 'Hercules,' St. John, N.B.

INDIANTOWN, ST. JOHN, N.B., March 13, 1908.

DEAR SIR,—With reference to tug *Hercules,* we have recently offered this boat to the minister for the sum of $6,000. The boat is 66-foot keel, 20-foot beam, 9-foot hold. The engine is non-condensing. Cylinder 24 inches dr. 24 inches stroke. The boiler is Scotch marine type 8 feet 6 inches dr.., 9 feet long, and is inspected for a working pressure of 80 lb. steam. The boat has always been kept in good condition as inspection will show.

The *Hercules* is well suited for towing dredge scows in the harbour. Owing to the settlement of some partnership matters requiring cash payment, we decided to offer the boat to your department for the above figure. We have named the lowest price we will accept, and consider the boat of much greater value.

Will you come to St. John and inspect this boat? We think, if you will do this, you will see, after a thorough inspection, that the boat is of much greater value to the department than the price asked. We feel sure, after seeing the *Hercules,* and taking

into consideration the power and condition of the steamer, you will admit that $6,000 is an exceedingly low price for a boat of this kind.

Trusting this matter will have your kind attention, we are, yours truly,

James Howden, Esq., Gen'l. Supt. of Dredging. TAPLEY BROS.

St. John, N.B., May 1, 1908.

Dear Sir,—I received your letter of April 7, in *re* the tug *Hercules*, and had the boiler inspector examine and report on the boiler and engine on the 20th ultimo, and herewith inclose his report, giving details. I also had the inspector of hulls examine and report on the hull on the 24th ultimo, and herewith inclose his report of examination, giving details.

I was present at the examination by Mr. C. E. Dalton and Mr. I. J. Olive, and examined the hull, engine and boiler and the borings as made in the hull, and found them as stated, in fair condition below water, considering her age. Stern post sound, but on account of vibration caused by the working of propeller, and also by frequent caulking necessary, the rabbet seam had become enlarged, and was well pined and caulked through wedges and kept tight. Otherwise the keel, bottom and stem were in a fair condition below water line. Above the propeller found the outer end of stern knee on the overhang showing some signs of decay; rudder and shoe supporting same to be in good condition. Around topsides, above water, I found guards, covering board and rails forward want repairs, and with some repairs the tug *Hercules* may be serviceable in inland or harbours for some time.

Length of hull, 73 feet; beam, 20 feet; depth, 8 feet 2 inches; horse-power, 50; built on March 18, 1874, estimated value, $5,000.

She may, with some repairs, be used in connection with dredging in St. John harbour.

Yours, &c.,

James Howden, Esq., Ottawa. W. J. McCORDOCK, *Supt. of Dredging.*

Steamboat Inspector's Office, St. John, N.B., April 20, 1908.

Sir,—With reference to your request that I furnish you with a report on the boiler and engine of the steam tug *Hercules*, the report to give the principal dimensions, age and present condition of the boiler and machinery, I beg to report that I have complied with your request and give here the particulars asked for.

The boiler was built in 1890, by I. Matheson & Co., New Glasgow, N.S., is of the return tubular type, 9 feet dia. and 9 feet 6 inches long, has two furnaces 29 inches dia. and 6 feet 11 inches long, has 112 tubes 3 inches dia. and 7 feet long, 29 of them are stay tubes.

The engine is of the non-condensing type with one cylinder 24½ inches dia. and 24-inch stroke; was built in 1867 by Geo. Fleming & Sons, St. John, N.B.; is fitted with exhaust which may be turned into funnel if desired. A heater is also fitted to the exhaust for heating feed water; an expansion valve is fitted to regulate cut-off. The crank is overhung; a feed and bilge pump work off rock shaft on back of engine frame, which is A-shaped and strongly constructed and well fastened to hull. I have to report that boiler and machinery were carefully examined, the boiler internally and externally, and then tested to 120 lbs. cold water test, and found in good condition. The cylinder covers and valve casing covers were removed and surfaces of cylinder and valve seating examined and found in fair condition.

Te funnel and uptake were examined and the funnel is in fair condition, but casing is thin in spots on top end; dia. of funnel 36 inches and length to grate bars, 28 feet.

Stern bearing, wheel, collar and fastenings were examined while boat was on blocks and found in fair condition.

I am, sir, your obedient servant,

The Supt. of Dredging, St. John, N.B. C. E. DALTON, *Steamboat Insp.*

St. John, N.B., April 24, 1908.

Sir,—In compliance with your verbal request, I proceeded to Rankin's blocks (so-called), north end, St. John, on April 14, and made a careful examination of the condition of the hull of tug *Hercules,* of St. John, N.B.

Bored her in several places on outside, where, in my judgment, would show the condition of frame and planking found in fair condition for age; sternpost sound, but on account of vibration caused by the working of propellor, and also by frequent caulking necessary, the rabbet seam had become enlarged, and was well pined, and caulked through wedges and kept tight. Otherwise keel, bottom and stem were in fair condition below water line.

Above the propeller, found the outer end of stern knee on the overhang showing some signs of decay, rudder and shoe supporting same to be in good condition (shoe being almost new). Around topsides, above water, I found guards, covering board, and rails forward want repairing. Main deck, house and wheel-house being new are in good condition.

I would further say that on March 6, 1908, I examined this steamer for other parties in Sydney slip, St. John, bored on the inside in coal bunkers, and at several other places; discovered no rotten wood, but of course decayed some on account of age and wear and tear.

Ceiling and the keelson, as far as could be seen, were in fair condition.

Her equipment is in fair condition, excepting small boat carried on house, which is about used up.

I consider this vessel with her hull in very fair condition below water line, and with some repairs above, is good for any work to be done in that line, in any inland waters or harbour.

Respectfully yours,

The Supt. of Dredging, St. John, N.B. I. J. OLIVE.

Audit Office, Ottawa, September 8, 1908.

Sir,—I beg to acknowledge receipt of your application No. 472 for $6,000 in favour of Daniel Fletcher Tapley, being purchase price of tug *Hercules.*

The usual certificate 'prices fair and just,' is lacking.

Information should be supplied as to the cost of construction of a similar vessel at the present time, the estimated cost of repairs necessary to put the tug in first-class condition, and the probable duration of her subsequent usefulness.

In Mr. McCordock's report, mention is made of a letter to Mr. Howden giving reports and full particulars. A copy of this letter might be supplied.

Your obedient servant,

The Dep. Min., Public Works. FREDERICK HAYTER, *for A.G.*

PUBLIC WORKS DEPT., OTTAWA, September 14, 1908.

(Telegram.)—*Re* tug *Hercules,* Audit Office want information as to cost of construction of similar vessel at present time, what repairs were necessary before tug placed in commission, and what would be probable duration of her subsequent usefulness.

The Supt. of Dredging, St. John, N.B. J. B. HUNTER, *D.M.*

ST. JOHN, N.B., September 16, 1908.

DEAR SIR,—I beg to acknowledge the receipt of your telegram of the 14th inst., as follows: '*Re* tug *Hercules,* Audit Office want information as to cost of construction of similar vessel at present time; what repairs were necessary before tug placed in commission, and what would be probable duration of her subsequent usefulness.'

In reply, the cost approximatively of a similar tug, $25,000 at the present time.

Repairs to hull and machinery, new boat and 1½ set davits, new stem winch, new cables, hawsers and lines, water-closet hose, $2,500.

Probable duration of her subsequent usefulness, two seasons.

I have the honour, &c.,

The Dep. Min., Public Works. W. J. McCORDOCK, *Supt.*

ST. JOHN, N.B., September 23, 1908.

DEAR SIR,—Referring to my letter of the 16th instant, after consulting with Mr. Howden, it is seen that a large portion of the amount of $2,500 is underlined, because it contains matters of outfit about $1,400, which would reduce the amount of actual repairs to that amount. You will also note 'probable duration of *Hercules* subsequent usefulness, two seasons.' Two seasons refers entirely to the exposed position in which the dredge and tugs are now working. The *Hercules* it is probable in inland waters would run for four or five years, with incidental repairs.

I have the honour, &c.,

The Dep. Min., Public Works. W. J. McCORDOCK, *Supt.*

OFFICE OF THE SUPT. OF DREDGING, OTTAWA, September 25, 1908.

DEAR SIR,—With further reference to the tug *Hercules,* which was owned by Mr. Tapley, of St. John, N.B., I beg to inclose herewith copy of letter from the Messrs. Tapley Bros., offering to sell the boat for $6,000, the lowest figure they would accept.

While in St. John this week, I went on board the *Hercules* with Mr. W. J. McCordock, superintendent of dredging, and while there I made a thorough examination of the boat. I found her hull under water was quite sound. The boiler, which is a marine one, was in first-class condition, also her engine.

The few repairs which had been done, undoubtedly improved her appearance, and the tug, which is a powerful one, should be useful for the next four or five years under ordinary working conditions.

I have, therefore, no hesitation in saying that the price of $6,000 was quite fair and just.

I have the honour, &c.,

The Dep. Min., Public Works. JAMES HOWDEN, *Gen'l. Supt.*

PUBLIC WORKS DEPT., OTTAWA, September 28, 1908.

DEAR SIR,—With reference to your letter of the 8th instant, asking further particulars in regard to tug *Hercules,* I now beg to inclose you certificate from the superintendent of dredging that the prices are fair and just. Also information as desired regarding the cost of constructing a similar vessel at the present time, together with the actual expenses incurred in repairs, and the probable duration of the usefulness of the vessel.

I am also sending you herewith the report of Mr. McCordock, together with those of the hull and boiler inspectors, who examined the tug.

As the department has been using the boat now for some months, naturally the owner is clamouring for payment, and I shall be glad if you can see your way to pass the application for same immediately.

Yours very truly,

The Auditor General. J. B. HUNTER, *D.M.*

Re *Tug 'Hercules.'*

AUDIT OFFICE, OTTAWA, October 8, 1908.

SIR,—I have to acknowledge receipt of your letter of September 28, inclosing reports of Mr. McCordock and the hull and boiler inspectors who examined the tug.

According to these reports the hull is 34 years old, the boiler 18 and engine 41 years old. The cost of a new tug of the same dimensions at the present time is put at about $25,000.

The cost of tug *Hercules* is $6,000; amount of expenditure required to put in serviceable condition is $2,500; total cost, $8,500. Probable duration of her subsequent usefulness in exposed position where dredge and tugs are now working, two seasons, with a probability in inland waters, with incidental repairs, that she would run four or five years.

I am not an expert in tug valuations, and therefore cannot decide as to the value of the certificates of your officials when they certify that a hull, boiler and engine of the ages above mentioned are worth $6,000; and as the purchase has been made and the department has been using the tug for some months, I shall be obliged to pass the certificate for payment. At the same time I think that in the interests of economy, it would have been better to have purchased a new vessel at $25,000 which, judging by the record of the *Hercules,* would give over 30 year's service, than to expend $8,500 for one which will probably give only two years' service.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

Tug 'Petrel': Victoria Machinery Depot.

(Following the discussion at pages V—315 to V—326, of 1906-7.)

NEW WESTMINSTER, B.C., November 6, 1907.

SIR,—I have the honour to acknowledge the receipt of your letter of 1st ultimo, inclosing a communication from the Auditor General, under date of September 24, asking for still further information in reference to the bill of extras incurred in the construction of the steel tug *Petrel,* amounting to $7.949.43, of which sum $5,000 has since been paid to the contractors, the Victoria Machinery Depot Co., Ltd., leaving a

balance of $2,949.43 still due, which, as the Auditor General states, will be released when satisfactory certificates are procured as indicated above and referred to in the following paragraph of the Auditor General's letter:—

'These certificates should cover two facts, first that the vessel is up to standard, and second that the vessel would have been up to standard without the extras. Any extras which cannot be so certified will need to be deducted.'

Since receiving the above communication, I have had a further interview with Lloyd's surveyor, Mr. Mitchell, and received from him a letter explaining the common practice in shipbuilding and as applied to our case, a copy of which is herewith inclosed.

In my letter of September 11 last, giving as full an explanation as it is possible to give, two facts are distinctly established. 1st. That in common with nearly every boat the *Petrel* is in excess of Lloyd's requirements. 2nd. That the extras in addition to these items in excess were considered necessary and are fully justified by results. They were ordered to be done, and if we saw fit to incur the expense I do not see why there should be any question as to the payment. The contractors, acting in good faith and under instructions, should not be made to suffer by further delay in the payment of the balance of their account.

I trust this explanation may be conclusive, as it is somewhat difficult to enlarge on the explanation already given.

I am, sir, your obedient servant,

The Dep. Min., Public Works. G. A. KEEFER, *Resident Engineer.*

VANCOUVER, B.C., October 18, 1907.

SIR,—Confirming our conversation of recent date, I may say that it is quite common practice for owners to have their vessels built to Lloyd's rules, even to have them built to class in Lloyd's Register of Shipping, and during construction to make alterations—and what they consider improvements—if they see fit to do so, and are willing to incur the expense.

There have been two cases here quite recently, that of the *Princess Royal*, built by the British Columbia Marine Railways Company, for the Canadian Pacific Railway; and the *Dola*, built by the Wallace Shipyards Company, for the Vancouver Tug and Barge Company ;the former is already classed in Lloyd's Register, the latter we hope to have classed at an early date; in each instance the owners have thought fit to incur several thousand dollars expense for work over and above what was absolutely necessary, and this, I take it, is what has been done in the case of your steamer *Petrel*.

I am, sir, your obedient servant,

T. G. MITCHELL, *Lloyd's Surveyor.*

G. A. Keefer, Esq., Res. Eng., New Westminster, B.C.

AUDIT OFFICE, OTTAWA, December 14, 1907.

SIR,—Let me acknowledge receipt of your communication No. 167544 on the subject of extras for the steel tug *Petrel*.

My letter of September 24, after noting that a civil engineer is not necessarily an expert in vessel construction, went on to remark: 'It would be preferable to have certificates from the two authorities mentioned in the specification, that is to say, Lloyd's and the Canadiana Marine Board. These certificates should cover two facts: 1st. That the vessel is up to standard, and 2nd. That the vessel would have been up to

standard without the extras. Any extras which cannot be so certified will need to be deducted. Since officers of these two boards were frequently present while construction was going on, they will not take long to report.'

The document now presented from Mr. T. G. Mitchell, Lloyds' surveyor at Vancouver, reads as follows: 'It is quite common practice for owners to have their vessels built to Lloyds' rules, even to have them built to class in Lloyds' Register of Shipping, and during construction to make alterations if they see fit to do so, and are willing to incur the expense. There have been two cases here quite recently, the *Princess* and the *Dola;* the former is already classed in Lloyds' register, the latter we hope to have classed at an early date; in each instance the owners have thought fit to incur several thousand dollars' expense for work over and above what was absolutely necessary, and this, I take it, is what has been done in the case of your steamer *Petrel.*'

Mr. Mitchell does not take up the points at issue. Please ask him to reply categorically to the questions 1 and 2 as shown above, namely: (1) Is the *Petrel* up to Lloyds' standard; and (2) would she have been up to Lloyds' standard without the extras? Similarly for the Canadian Marine Board.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

VANCOUVER, B.C., April 11, 1908.

DEAR SIR,—I duly received yours of the 28th ultimo in reference to the steamer *Petrel*, a list of the extra articles supplied to this steamer by the Victoria Machinery Depot, and a copy of a letter from the Auditor General to the Deputy Minister of Public Works in regard to these extras, in which that gentleman wishes me to answer these two questions:—

1st. Is the *Petrel* up to Lloyds' standard? Except in what may be considered as unimportant particulars, I am of opinion that she is.

2nd. Would she have been up to Lloyd's standard without the extras? Lloyds' rules do not apply to these extras. You can make what betterments you please if you are willing to pay for them, and most of the items for which the extra expense has been incurred are, in my opinion, betterments.

I am, sir, your obedient servant,

The Assistant Engineer, New Westminster. T. G. MITCHELL, *Lloyds' Surveyor.*

(Note by Auditor General, December 22, 1908: Upon receipt of Mr. Mitchell's letter of April 11, the final estimate was released.)

Wharfs and Piers.

Rosseau wharf, Ont., May-July, 1907 ..... $ 103 85

Subsequent Revenue collected by Department of Marine and Fisheries.

Re **Telegraph Revenue.**

AUDIT OFFICE, OTTAWA, December 26, 1907.

SIR,—Deposits have come to account from telegraph revenue for the current fiscal year amounting to $75,974.43.

The revenue for July is the last received from the Magdalen islands, and from eleven other lines the revenue for August is the last received.

The revenue for each month should be brought to account during the succeeding month or very shortly afterwards.

No returns have been furnished corresponding to the revenue brought to account. Presumably they are in your department. Their absence interferes with the work of this office.

Your early attention is requested.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, January 8, 1908.

SIR,—I beg to acknowledge the receipt of your letter of the 26th ultimo in reference to delays in forwarding telegraph revenue returns. The matter will have due attention.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, February 20, 1907.

SIR,—I wrote you December 26, calling your attention to the delay in bringing telegraph revenue to account and stating that no returns had been furnished for the present fiscal year.

You replied on January 8, that the matter would have due attention.

All the revenue accrued to December 31 should be deposited and brought to account by this date.

The last deposit from quarantine office is for August; the last deposit from eight other offices is for September; from five other offices is for October, and from two only for November.

The deposits from the North Shore, E.B., are also very much in arrears.

No returns have yet been received from any office for the present fiscal year.

Unless this revenue is placed in a more satisfactory condition at an early date, I will feel obliged to again report the matter to the Treasury Board.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, February 24, 1908.

SIR,—I have the honour to acknowledge receipt of your favour of the 20th instant. Your previous letter of December 26 has not come before me.

I shall at once take up with the chief accountant the question of returns of telegraph revenue.

Yours very truly,

The Auditor General. J. B. HUNTER, *Act. D.M.*

AUDIT OFFICE, OTTAWA, March 12, 1908.

SIR,—I wrote you on March 9, 1907, in reference to the checking and adjusting the returns from the different telegraph offices, to which I got no reply.

The certificate of the district superintendent on the monthly return does not intimate that the returns from the different offices are checked with one another. This work should be done.

The revenue from the Magdalen Islands line for May last was $271.85, for June only $82.26, and for July $163.66. Do you ask for any explanation of such large differences?

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, March 23, 1908.

SIR,—With further reference to your letter of the 12th instant *re* telegraph revenue, I beg to state that the returns from different offices will be carefully checked, and as regards the falling off in revenue of Magdalen Islands line during June last, this was the result of an interruption in the cable between Cape North and Magdalen Islands. The break occurred on May 31, 1907, and was repaired on July 11 following.

Yours very truly,

The Auditor General. J. B. HUNTER, *Act. D.M.*

Re Telegraph Revenue, Kamloops and Penticton.

AUDIT OFFICE, OTTAWA, March 12, 1908.

SIR,—There is a slight difference each month in the amount due the Canadian Pacific Railway Telegraph Company at Kamloops, as shown by the returns of the agent, and the amount credited the company on settlement.

The following are the details:—

	As per Agent's returns.	As per Settlement.
April	$73 01	$73 87
May	48 45	53 53
June	85 20	80 14
July	32 51	30 48
August	64 23	63 99
September	50 78	53 24
	$354 18	$355 25

There is also a difference at Vernon in September; the agent's return calls for $179.67, the settlement shows $180.67.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, March 18, 1908.

SIR,—I am directed to acknowledge the receipt of your letter of the 12th instant, drawing attention to a slight difference, each month, in the amount due the Canadian Pacific Railway Telegraph Company at Kamloops, as shown by the returns of the

agent, and the amount credited to the company on settlement. The matter will have the careful attention of the department.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, September 18, 1908.

SIR,—Referring to previous correspondence in reference to the revenue of 1907-8, I have to call attention to the arrears due by the operator at Princeton, amounting to $155.62.

The balance of the revenue for March, $335.91, was not deposited till July, too late to be credited to 1907-8.

The return for April is the only one received belonging to this year. Deposits amounting to $475 have been received on account of May return; $410 on account of June, and $190 on account of July.

It is to be hoped that you will soon succeed in having the returns and deposits from this line for each month forwarded before the close of the next.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, September 24, 1908.

SIR,—I have the honour to acknowledge the receipt of your letter of the 18th instant, in reference to the returns and deposits from the above line, and drawing attention to previous correspondence respecting arrears due by the operator at Princeton. The matter will have due attention.

I am, sir, your obedient servan

The Auditor General. NAP. TESSIER, *Secretary.*

Re **Telegraph Revenue, North Shore, E.B.**

AUDIT OFFICE, OTTAWA, September 18, 1908.

SIR,—When the accounts for 1907-8 were closed, $1,171.08 of the revenue accrued had not come to account. On July 17, $200.25 was deposited, nothing since, and nothing on account of the revenue accrued since March 31.

You will realize that this condition of affairs is most objectionable, and will no doubt take immediate steps to have the receipts more promptly brought to account.

Have you considered my previous suggestion to have these lines placed under a superintendent whose duty it would be to see that the several operators promptly account for their receipts?

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, September 24, 1908.

SIR,—I beg to acknowledge the receipt of your letter of the 18th instant, in reference to delay in accounting for receipts. The matter will have due attention.

I am, sir, your obedient servant,

The Auditor General. NAP. TESSIER, *Secretary.*

AUDIT OFFICE, OTTAWA, November 4, 1908.

SIR,—You wrote September 24, acknowledging receipt of my letter of the 18th, in reference to the delay in accounting for receipts from the telegraph offices on the North Shore, E. B., and stating the matter will have due attention.

Not a single return nor deposit receipt has since been received.

Over $900 of the revenue accrued previous to March 31 last, and all the revenue since accrued, are still in arrears.

Your early attention is requested.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

Re **Telegraph Revenue, North Shore, W.B.**

AUDIT OFFICE, OTTAWA, September 18, 1908.

SIR,—The return for July, 1907, showed the net revenue as $203.85 on account of which a deposit of $142.43 was made, leaving a balance of $61.42. This is made up on the return as follows:—

Amount remitted to department		$29 22
N. Shore Quarantine, Escuminac	13 60	
	18 60	
		$61 42

These items have not come to account.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, September 24, 1908.

SIR,—I have the honour to acknowledge the receipt of your letter of the 18th instant, in reference to unaccounted receipts for $61.42. The matter will have due attention.

I am, sir, your obedient servant,

The Auditor General. NAP. TESSIER, *Secretary.*

Re **Telegraph Revenue, Nanaimo-Comox.**

AUDIT OFFICE, OTTAWA, September 18, 1908.

SIR,—Referring to my letter of June 5, I have now to call attention to the discrepancies between the amounts due to and by the Canadian Pacific Railway Telegraph as stated on the returns, and the amounts claimed and settled by the company.

The returns claim as due by the Canadian Pacific Railway Telegraph, as follows:—

November	$13 23
January	9 67
February	7 68

None of these amounts are allowed in the settlements.

The return for December states $14.84 due the company; the settlement is only $10.21. The return for March states $50.77 as due to the company; the settlement is $51.90.

The net difference is $27.08.

In making up return for publication in Audit Report, I have deducted this balance from the $100 seemingly over-deposited, showing the over-deposit as $72.92.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, September 24, 1908.

SIR,—I have the honour to acknowledge the receipt of your letter of the 18th instant, drawing attention to discrepancies between the amounts due to and by the Canadian Pacific Railway Telegraph as stated on the returns, and the amounts claimed and settled by the company. The matter will have due attention.

I am, sir, your obedient servant,

The Auditor General. NAP. TESSIER. *Secretary.*

Telegraph Revenue, Northwest Lines.

AUDIT OFFICE, OTTAWA, September 18, 1908.

SIR,—There is a difference of $27.58 between the returns and the deposits of the Northwest Lines, made up as follows:—

Paid Can. Pac. Ry. Tel.	$841 83	
Returns show as due	822 78	
		$19 05
Due from R.N.W.M. Police, February		9 36
		$28 41
Less over-deposited by Indian Dept. for July, 1907		0 83
		$27 58

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, September 24, 1908.

SIR,—I have the honour to acknowledge the receipt of your letter of the 18th instant, drawing attention to a difference of $27.58 between the returns and deposits of the northwest lines. The matter will have due attention.

I am, sir, your obedient servant,

The Auditor General. NAP. TESSIER, *Secretary.*

Re **Telegraph Revenue, Vancouver and Salt Springs.**

AUDIT OFFICE, OTTAWA, September 18, 1908.

SIR,—There is a short deposit from this line of $6.06, made up as follows:—

Return for October		$39 48
Deposits—Feb. 7	$15 00	
Mar. 11	11 42	
		26 42
		$13 06
Less deposit Sept. 20, 1907		7 00
		$6 06

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

DEPT. PUBLIC WORKS, OTTAWA, September 24, 1908.

SIR,—I have the honour to acknowledge the receipt of your letter of the 18th instant drawing attention to a short deposit from this line of $6.06. The matter will have due attention.

I am, sir, your obedient servant,

The Auditor General. NAP. TESSIER, *Secretary.*

Re **Telegraph Revenue, British Columbia.**

OTTAWA, September 18, 1908.

SIR,—On September 20, 1907, Mr. Henderson deposited $36 on account of Alberni and Clayoquot for August, $56 on account of Golden and Windermere, and $100 on account of Nanaimo and Comox.

The returns for August from these offices do not call for these deposits.

I have to ask for an explanation.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, September 24, 1908.

SIR,—I have the honour to acknowledge the receipt of your letter of the 18th instant, in reference to deposits made by Mr. Henderson on September 20, viz: $36 on account of Alberni & Clayoquot, $56 on account Golden & Windermere, and $100 on account of Nanaimo and Comox.

The matter will have due attention.

I am, sir, your obedient servant,

The Auditor General. NAP. TESSIER, *Secretary.*

AUDIT OFFICE, OTTAWA, December 9, 1908.

SIR,—I have recently received from the assistant superintendent telegraph lines, a letter from your agent in British Columbia, dated October 9 last.

This letter is in reference to five deposits made by him in August, 1907, explaining why he did not take credit for them on his returns at the time, and stating that he would now do so.

This transaction is an evidence of very incomplete checking of the returns in your department; and of very inadequate account-keeping on the part of the agent.

It seems incredible that he could have deposited $289 on September 20, 1907, and took no credit for the deposits till the receipt of your letter of September 25, 1908. Where did he get the money he deposited?

Presumably these over-deposits were not observed by your officers till attention was called to them from this office.

In my letter of September 18, it was pointed out that the Can. Pac. Ry. Telegraph were allowed $27.08 more than was accounted for in returns from Nanaimo and Comox. If you decide that the agent should yet be allowed for the deposit of $100 made September 20, 1907, this amount should be deducted.

In reference to deposit of $7 on account of Vancouver-Salt Springs, I pointed out in my letter of September 18, that after allowing this deposit, there was still $6.06 not accounted for.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

Re **Telegraph Revenue, Quarantine.**

AUDIT OFFICE, OTTAWA, September 18, 1908.

SIR,—The returns from Quarantine for 1907-8 amount to $495.37, and the deposits to $443.68, leaving a balance not accounted of $51.69.

The returns for the first six months amounted to $432.26, which was promptly deposited.

The returns for the following six months only amounted to $63.09, of which $11.42 is all that has come to account.

Returns have been received for four months of the current year amounting to $50.93, for which no deposits have come to account.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, September 24, 1908.

SIR,—I beg to acknowledge the receipt of your letter of the 18th instant, in reference to receipts unaccounted for. The matter will have due attention.

I am, sir, your obedient servant,

The Auditor General. NAP. TESSIER, *Secretary.*

Re **Slide and Boom Dues.**

AUDIT OFFICE, OTTAWA, June 12, 1908.

SIR,—According to the returns lately received there is $5,541.72 of the dues accrued on the Ottawa works which has not been paid. The collector explains that $2,389.32 of this amount will be paid in July. The firm have been granted time till then by the department. The balance is due by several firms for dues at Cheneaux boom withheld, pending their application for a reduction of the charges. The department should dispose of this application without delay. If that is not practicable immediate payment of these dues should be demanded. If any reduction be subsequently made, and it is deemed proper, refunds can be made.

There is also a balance due on the Newcastle works of $198.43 which the collector explains has been settled by a note and will shortly be paid.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA,
September 23, 1908.

SIR.—I have to call attention to the following items in the statement of arrears on account of slide and boom dues lately received from your department:—

J. R. Booth, 1903.	$339	27	Petewawa slidage, disputed.
Hawkesbury Lum. Co., 1903.	298	10	" " "
" " 1907.	743	32	Cheneaux boomage.
J. R. Booth, 1907.	1,912	41	" "
Shepard & Morse L. Co., 1907.	434	56	" "
Est. R. Hurdman.	62	11	" "

A claim for reduction on last four items is before the department.

Do you not think it desirable that these claims should be inquired into without delay, and the amounts justly due established and collected?

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G*

PUBLIC WORKS DEPT., OTTAWA, September 28, 1908.

SIR,—I have the honour to acknowledge the receipt of your letter of the 23rd instant, *re* arrears slide and boom dues, suggesting that the claims for reduction of the Hawkesbury Lumber Co., J. R. Booth, Shepard & Morse Lumber Co., and Est. R. Hurdman be inquired into and the amounts due established and collected. The matter is having the attention of the department.

I am, sir, your obedient servant,

The Auditor General. NAP. TESSIER, *Secretary.*

Re **Wharfs and Piers.**

AUDIT OFFICE, OTTAWA, November 28, 1907.

SIR,—I have had no reply to my letters of April 27, 1906, and June 7, 1907, in reference to wharfs that have not been transferred by your department to the Department of Marine and Fisheries.

Judging from a statement furnished by you in 1904, and from the number of wharfs which have since been completed by your department, it would appear that there are a very considerable number of wharfs that have not been transferred to the Department of Marine and Fisheries, and in consequence, no tolls have been collected.

In view of this condition of affairs, I feel constrained to report the matter to the Treasury Board.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, December 4, 1907.

SIR,—I beg to acknowledge the receipt of your letter of the 28th ultimo, drawing attention to previous correspondence in reference to wharfs that have not been transferred by this department to the Department of Marine and Fishries. I am to state, in reply, that this question is now being submitted to Council by the minister.

I am, sir, your obedient servant,

The Auditor General. FRED. GELINAS, *Secretary.*

AUDIT OFFICE, OTTAWA, December 24, 1908.

SIR,—On December 4, 1907, you wrote acknowledging my letter of November 27, in which I called attention to the large number of wharfs erected by your department, which had not been transferred to the Department of Marine and Fisheries, and for the use of which no fees were being collected.

You stated that the matter was being submitted to council by the minister.

There has since come to account $103.85 for fees at Rousseau wharf, collected through the officers of your department; nothing else.

I have to inquire what decision the council came to in reference to these wharfs. I have also to ask for a list of any wharfs since transferred.

I am, sir, your obedient servant,

The Dep. Minister, Public Works. J. FRASER, *A.G.*

Re **Public Buildings, Saskatchewan and Alberta.**

AUDIT OFFICE, OTTAWA, November 30, 1907.

SIR,—An order in council was passed July 20, 1906, in reference tc the transfer of the public buildings in the provinces of Saskatchewan and Alberta, to the governments of these provinces.

The order directs that the buildings and furniture in the province of Saskatchewan be transferred to that province, the provincial government agreeing to pay therefor $231,474.96 in five annual instalments. The first instalment was due July 1, 1906 and has been paid.

The second instalment was due July 1, 1907. Has it been paid ?

I have to inquire if the public buildings in the province of Alberta have been transferred, and, if so, I would like to have the date of the order in council in reference thereto. I do not find that anything has come to account from this province.

I am, sir, your obedient servant,

The Dep. Min., Public Works. J. FRASER, *A.G.*

PUBLIC WORKS DEPT., OTTAWA, December 9, 1907.

SIR,—With reference to your letter of November 30, I beg to state that the public buildings in the province of Alberta have not yet been transferred to that province but that negotiations are under way at present, and have been for some time, with a view to arriving at an agreement concerning that transfer.

As regards the second instalment payable by the province of Saskatchewan under the same service, I beg to say that the accountant of the department is now in communication with the authorities of that province in respect to this matter.

I am, sir, your obedient servant,

The Auditor General. A. GOBEIL, *Deputy Minister.*

Rodmen at $45: A. Chaloner, May-July, 2·548 m.; B. T. Griffith, Aug.-Mar., 8 m.; W. C. Johnstone, Apr., ·4 m	492 70
Tapemen at $40: H. J. Campbell, Apr., ·4 m.; W. J. Nixon, Aug.-Oct., 2·7737 m.; W. L. Saunders, Apr.-July, 3·871 m.; E. J. Smith, Sept.-Feb., 6 m	521 80
Timekeepers at $50, Apr.-Nov., $400, cooks at $50, Apr.-Mar., $600; teamsters at $4 per d., Oct., $8; axemen at $40, Apr.-Aug., Mar., $234.10	1,242 10
Residency No. 37 ($4,657.05)—	
Howard Brunlees, resident engineer, Apr.-Mar., 12 m. at $135	1,620 00
Instrument men at $80: A. McNaughton, June-July, 2 m.; J. McCoubrey, June-Jan., Mar., 7·5612 m	764 90
R. C. Weatherhead, tapeman, Apr., 1 m., rodman, May-Mar., 11 m. at $45	535 00
Tapemen at $40: R. L. Barwell, Dec., 1 m. at $40; H. Dostaler, June, ·8 m.; B. T. Griffith, July, ·54875 m.; L. W. Lester, June-Mar., 9·933 m.; E. H. B. Thompson, Sept.-Nov., 2·3663 m	585 95
Timekeepers at $50, Dec.-Mar., $200; cooks at $50, Apr.-Mar., $600; labourers at $2.25, Nov., $15.70; axemen at $40, Apr.-Aug., Nov., Jan.-Mar., $335.50	1,151 20
Residency No. 38 ($3,091.30)—	
J. A. Mackenzie, resident engineer, June-Mar., 9·2 m. at $125	1,150 00
C. Young, instrument man, Oct.-Mar., 6 m. at $80	480 00
H. Dostaler, July-Mar., 9 m. at $45; tapemen at $40: P. H. Barclay, July, Sept.-Dec., 4·9039 m.; Geo. Lindsay, July-Mar., 8·9037 m	957 30
Axemen at $40, July-Mar	504 00
Residency No. 39 ($4,190.90)—	
Resident engineers: D. A. McDougall, Apr., 1 m. at $135; F. P. Moffatt, May-June, 2 m. at $135	405 00
W. B. Young, land surveyor, Mar., 12 d. at $10 per d	120 00
J. V. Dillabough, instrument man, May-June, 1·4837 m. at $80; res. engineer, July-Mar., 9 m. at $125	1,243 70
A. McNaughten, instrument man, leveller, Aug.-Mar., 7·322 m. at $84	615 10
Tapemen at $40: Wm. Craig, Nov.-Dec., 2 m.; H. Lester, Sept.-Feb., 6 m.; P. Malmo, Sept.-Oct., 1·366 m	374 65
A. B. Adamson, rodman, May-Aug., 3·71 m. at $45; G. T. Barber, topographer, Feb., 9 d. at $2.25; C. E. C. Bashford, tapeman, May-Aug., 3·71 m., at $40, rodman, Sept.-Mar., 7 m. at $45	650 60
Teamsters at $6 per d., Apr., $48; axemen at $40, May-Sept., Jan.-Mar., $330.70, at $2.25 per d., Feb., $68.65; watchmen at $45, June-Jan., $334.50	781 85
Supernumery Party engaged in re-measurements ($266.70)—	
F. C. Jackson, instrument man, Sept.-Oct., 1·7 m	136 00
Tapemen, R. L. Barwell, Oct., 1 m. at $40; Wm. Craig, Oct., 1 m. at $40	80 00
Axemen at $40, Sept	50 70
1906-7 arrears carried to 1907-8	40 09

Rivière du Loup: Suspension Foot Bridge.

AUDIT OFFICE, OTTAWA, August 14, 1908.

SIR,—Let me acknowledge receipt, for audit before payment, of a voucher for $810 in favour of Messrs. Cloutier & Gaudreau, being estimate No. 1 for 'construction and erection of a suspension foot bridge over the river at Rivière du Loup,' the full contract for which is $1,620.

The specification contains no description of the manner in which the suspension foot bridge is connected with the Intercolonial Railway service. Please have this omission rectified.

I am, sir, your obedient servant,

Gen. Manager Govt. Rys., Moncton, N.B. FREDERICK HAYTER, *for A.G.*

MONCTON, N.B., August 27, 1908.

DEAR SIR,—I have to acknowledge receipt of your communication of the 18th instant (being your No. D2-9809) inclosing a letter from the Auditor General with regard to a voucher for $810 in favour of Messrs. Cloutier and Gaudreau, being estimate No. 1 for the construction and erection of a suspension foot bridge over the river at Rivière du Loup, and stating that the Auditor General informs you that the description does not in any way connect the suspension foot bridge with the Intercolonial Railway, and asking to have such necessary addition made to the voucher. I return you herewith the voucher, together with a blue-print showing the position of the bridge and the chief engineer's letter of the 26th instant, covering copy of a letter from the secretary of the Department of Railways and Canals to the general manager of the Temiscouata Railway, in which it will be seen that the department informed that railway that they had in contemplation the construction of a foot bridge.

Yours truly,

Gen. Man. Govt. Rys., Moncton, N.B. S. L. SHANNON, *Comptroller.*

AUDIT OFFICE, OTTAWA, September 10, 1908.

SIR,—Let me acknowledge receipt of your letter inclosing Chief Engineer MacKenzie's report concerning the estimate of Cloutier & Gaudreau for 'suspension foot bridge over the river at Rivière du Loup.'

Mr. MacKenzie's report does not solve the difficulty, which is that the specification does not show the bridge to be necessary for the railway service. This is essential, if its cost is to be carried by a railway vote.

I am, sir, your obedient servant,

Gen. Manager Govt. Rys., Moncton, N.B. FREDERICK HAYTER, *for A.G.*

MONCTON, N.B., October 17, 1908.

DEAR SIR,—Referring to your No. D2-9809 of the 15th ult., with respect to the explanation required by the Auditor General in connection with Cloutier & Gaudreau's voucher for construction and erection of a suspension foot bridge over the river at

Rivière du Loup. I took this matter up again with the chief engineer, and am in receipt of a letter from him dated 16th instant, in which he states:—

'The suspension foot bridge over Rivière du Loup from the I.C.R. yard to the Town street is necessary to the proper and safe working and use of the engine-house, locomotive shops and coaling plant recently constructed at that place. It has put an end to the danger to life and I.C.R. property, caused by having 200 men spread themselves all over the station yard tracks in the midst of shunting operations and moving trains while passing between those shops and their homes four times every day for a distance of about half a mile.'

Yours truly,

Gen. Man. Govt. Rys., Moncton, N.B. S. L. SHANNON, *Comptroller.*

Moncton Shops: Sewer.

AUDIT OFFICE, OTTAWA, July 27, 1908.

SIR,—At a recent session of the Public Accounts Committee, there was a discussion about a sewer from the new Intercolonial Railway shops at Moncton, on which some $90,000 worth of labour had been performed.

We do not find that any progress estimates have yet been issued for this work.

Would it not be well to treat this extra like the others, and have the engineers measure and report it promptly from time to time? There would be less chance of disputes when making final settlement. This is the course provided by the main contract

I am, sir, your obedient servant,

Gen. Mgr. Govt. Rys., Moncton, N.B. J. FRASER, *A.G.*

MONCTON, N.B., July 29, 1908.

SIR,—I have your letter dated July 27, with reference to the work on the sewer from the new I.C.R. shops at Moncton, and I will take this matter up with the chief engineer, Mr. MacKenzie, who is looking after it.

I am, sir, your obedient servant,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

Note by A.G.: No estimate for this work has yet reached the Audit Office; December 10, 1908.

Quebec Bridge: Transcontinental Officials also employed by Bridge Company.

AUDIT OFFICE, OTTAWA, April 14, 1908.

SIR,—In the report of the committee which recently investigated the Quebec bridge, I notice that Mr. Hoare is spoken of as one of the Quebec Bridge Company's officials.

This is, I suppose, the same Mr. E. A. Hoare who appears at page W—298 of the last report as: 'Quebec bridge division and Cap Rouge viaduct; E. A. Hoare, engineer-in-charge, July, 1906, to March, 1907; 9 months, at $200.' He also received $200 a month up to February, 1908, the last pay-list in hand.

Please let me know what salary he received from the Bridge Company; and send me a copy of any document which authorized his double responsibility.

I would like similar information for any other members of the bridge staff who may have worked in both fields.

I am, sir, your obedient servant,

The Secretary, Transcontinental Railway Commission. J. FRASER, *A.G.*

OTTAWA, May 1, 1908.

SIR,—In regard to the Auditor General's letter to the secretary, dated 4th instant, *re* Mr. E. A. Hoare and others who were employed by us under him, and who were also in the employment of the Quebec Bridge Company, I beg to report as follows:—

Mr. E. A. Hoare has been in our employment since October, 1904, at a salary of $200 per month. Up to October, 1906, he was in charge of the location and construction of our line from the north abutment of the Quebec bridge westerly to the west end of the Cap Rouge viaduct, and also of the surveys from the Quebec Bridge Company's line at the east side of the Chaudière river crossing for two or three miles easterly. Since the last mentioned date he has been in charge of the erection of the Cap Rouge viaduct.

The following persons have also been partially employed by us:—

P. Myrand, draughtsman, since July, 1906, at $25 per month, and C. E. Murphy, stenographer, since July, 1907, at $15 per month. The work of all of them has been satisfactory to us.

I am not in a position to state what salaries were paid them by the Quebec Bridge Company.

Your obedient servant,

The Comiss'ers of the Transcontinental Ry. HUGH D. LUMSDEN, *Chief Eng.*

Transcontinental Railway: Rental of Contractors' Plant for Extra Work.

AUDIT OFFICE, OTTAWA, June 27, 1908.

SIR,—Your attention is directed to several items paid to contractors under extra work orders, as follows:—

Macdonell and O'Brien.

Order 155, Caissons St. Maurice River bridge, March, 1908, estimate:

Rent of diving apparatus, 24 days at $5	$120 00
Plus 10 per cent for profit, &c	12 00
	$132 00

(Wages of diver and assistants also paid at $10 and $2.50 per day, respectively, plus 10 per cent.)

J. D. McArthur.

Order 258, foundation of pier and east abutment, Winnipeg River bridge:

September, 1907, estimate, rent of barge	$58 50
Plus 10 per cent for profit, &c	5 85
	$64 35

November, 1907, estimate, rent of engine, pump and scow, net		$430 00
January, 1908, estimate, rent steam pump and engine, 20 days at $10	$200 00	
Plus 10 per cent profit, &c	20 00	
		220 00

Order 266, rock excavation of floor and walls of culvert, Stn. 2439 + 30, mile 46·2:

Nov., 1907, estimate, rent of derrick, 15 days at 50c.	$ 7 50	
Dec., 1907, estimate, rent of derrick, 22 days at 50c.	11 00	
Jan., 1908, estimate, rent of derrick	5 00	
		$23 50
Plus 10 per cent for profit, &c		2 35
		$25 85

Order 23, lowering grade Stn. 844 + 75 to 847 + 50, mile 121:

Sept., 1907, estimate, rent of car, 50 hrs. at 7½c	$3 75
Plus 10 per cent for profit, &c	0 38
	$4 13

Section 35 of the contract with these firms reads in part as follows: In addition to the foregoing contract price, the commissioners will pay to the contractor for extra work done . . . . . the actual cost of such work, with an additional ten per cent on the cost of labour and material, for the use of tools, contractor's plant, superintendence and profit; but such actual cost shall not exceed the reasonable market value of such labour and material, as the case may be.' All of the payments in question appear to be for rent of contractor's plant, which, under the said section 35, should be covered by the 10 per cent allowance.

We would be glad to have your chief engineer's views on these matters.

I am, sir, your obedient servant,

The Secretary, N. T. Railway. FREDERICK HAYTER, *for A.G.*

CHIEF ENGINEER'S OFFICE, OTTAWA, September 17, 1908.

DEAR SIR,—Replying to your communication inclosing letter of the Auditor General, dated June 27, concerning payment to contractors of certain items of expenditure on material supplied or facilities used in operations on the line under extra-work orders. I would say, the quotation by the Auditor General of section 35 of general contracts is correct, and its language seems to me, in itself, to answer the questions raised.

Contract work generally, and not extra work in particular, is let to contractors for the reason that we are not able to do it ourselves, or because it is more desirable, advantageous or economical to have it done by contract. There is a great difference between these two classes of work. In the first case, a specific rate is agreed upon for each item or class of work which covers all material labour involved. In the second case the various classes of work are undertaken for a lump sum of money, viz.: actual cost, 10 per cent for use of tools and contractors' plant, &c., &c., the terms 'contractor's plant,' as used in this connection, undoubtedly meaning everything needed in the way of plant and equipment, except special accessories of an unusual character required for the work in hand, and not in current daily use.

Much extra work is done for us by our general contractors or by their sub-contractors, of a nature not provided for in the general specifications, and such work is usually of a character that the demand for it could not have been reasonably anticipated. An estimate, by contractors, of the cost of doing such work cannot be other than a conjecture; their figures being based on the fact that some facilities are available which have been provided, sometimes at great expense, to carry on the operations of the general contract. Such use, therefore, of general plant in the execution of extra work, while being an incidental advantage to the contractor, is a distinct advantage to the commission, for it must be obvious that if a contractor, in bidding on a relatively small job of extra work involving a comparatively insignificant sum, which requires the temporary use of a steam engine, a steam pump, a diving apparatus, or a scow, &c., figures on obtaining and furnishing these facilities simply for the extra work incidentally offered to him, his bid under such conditions would, necessarily, in many cases, be almost prohibitory.

Referring to the particular items mentioned by the Auditor General. In the case of order No. 155, Caissons, St. Maurice River bridge, a diving apparatus was indispensable. Such equipment is not a part of the ordinary kit or plant of a contractor for grading, and, instead of making a charge of $750 or $1,000 for a diving apparatus (which being indispensable would naturally constitute a very proper item in the cost of the work), it was deemed more economical to rent an outfit temporarily. As to the charge for diver and assistants; it would seem unreasonable and unfair to demand or to expect the contractor to provide such expert labour free of cost; hence, in the account appears an item to cover their wages which, upon investigation by our Bridge Department, was found not to exceed the reasonable market value of such labour. In like manner, under extra work order No. 258, it has seemed to us that a charge of rent for unusual accessories essential to the class of work being done, is a fair item entering into the cost, and under such interpretation, the expenditure was duly approved.

In the case of extra work order No. 266, rock excavation 'rent of derrick,' I quite agree with the contention of the Auditor General's office that 'derricks' are a very common incidental feature of a contractor's plant, and that they should assuredly be supplied without extra charge, beyond the 10 per cent for their use. In fact, some time ago, in the usual course of our investigations, this point was raised and our district engineer notified that such items would not be allowed, and that any payments heretofore made on such account must be deducted.

The item under extra work order No. 23, which appears in the September estimate, 1907, lowering grade, mile 121, station 844 x 75 to 847 x 50, rent of car, 50 hours at 7½c. = $3.75, was not brought to my attention at the time. Cars, or dump-cars, such as this probably was, are undoubtedly a part of the plant of a grading contractor, and their use does not entitle the contractor to any compensation beyond the 10 per cent for profit. This item has been called to the attention of our district engineer, with instructions to have the charge deducted from the next estimate, providing it was as stated, viz., for 'rent' and not the cost of getting the car to the special work.

Yours truly,

Secretary, T. C. Ry. Commission. HUGH D. LUMSDEN, *Chief Eng.*

AUDIT OFFICE, OTTAWA, September 30, 1908.

SIR,—Your favour of the 18th instant is received, inclosing a copy of Mr. Lumsden's letter dated 17th instant, regarding payments made to contractors for rental of contractors' plant.

While section 35 of the general contract does not divide contractors' plant into two classes, Mr. Lumsden's explanation regarding payments for rental of special equipment and accessories is accepted as the contract's reasonable intent.

It is noted that payment for rental of derricks, dump-cars and similar equipment will not hereafter be allowed by the chief engineer; and that refunds will be obtained for any such payments already made.

I am, sir, your obedient servant,

The Secretary, N. T. Railway. FREDERICK HAYTER, *for A.G.*

Transcontinental Railway: Reduction in Classification.

AUDIT OFFICE, OTTAWA, October 17, 1908.

SIR,—In M. P. & J. T. Davis' estimate for June last on their contract for 150 miles easterly from Quebec, the following deduction and addition appear on residency 11 at station 3204:—

Item 59, 1-2-4 coping course 6 in. thick:

Deduction: 5,411 c. yards, at $15.. .. .. $81,165 00

Item 61a, 1-2-5 in 14a arch and over:

Addition: 9,062 c. yards, at $12.50. . . . . $113,275 00

This is apparently in part a re-classification, but no explanation was attached to the estimate returns. Will you please ask your chief engineer for particulars?

I am, sir, your obedient servant,

The Secretary, N. T. Ry. FREDERICK HAYTER, *for A.G.*

OTTAWA, October 20, 1908.

Re *40-ft. Arch Culvert, River Du Sud.*

DEAR SIR,—In order to enable you to reply to the Auditor General's letter of the 17th instant, I may say that, owing to the situation of the large arch culvert referred to, it being in a narrow gorge exposed to a strong current, especially when the water is high, the engineers on the ground decided to put in a 1-2-4 concrete mixture. This, in the first instance, they returned in their estimate at the only price in the schedule for such a mixture, viz., $15 per c. y. On my attention being called to it, I took exception to this rate being paid when the mixture was used in large masses, as such rate was intended to apply only to a 6″ facing mixture.

I had a meeting with the contractor and district engineer in my office, and arranged a price of $12.50 per c. y. for a 1-2-5 mixture, which was to apply to all the 1-2-4 mixture already used in the culvert referred to, and to any 1-2-5 mixture that it might be found advisable to use in future.

This arrangement caused a change in the estimates amounting to a re-classification. No price for such 1-2-5 concrete was given in the schedule on the M. P. & J. T. Davis contract referred to, but in contracts let subsequently, a price has been given in schedule under 61a.

Yours truly,

Secretary, N. T. Ry. Com. HUGH D. LUMSDEN, *Chief Eng.*

Transcontinental Railway: Loose Rock in Foundation Pits.

AUDIT OFFICE, OTTAWA, July 23, 1908.

SIR,—In the April, 1908, progress estimates paid to J. D. McArthur and M. P. & J. T. Davis (east of Quebec), certain quantities of loose rock in foundations were included at three times the schedule price of loose rock, and paragraph 41, of the general specifications, quoted in support. Paragraph 41 provides that 'excavations for foundation pits, including those excavated under water, but not requiring caissons, coffer-dams or other special appliances, shall be paid for at the schedule price per cubic yard excavated, such excavations to be kept dry, and the schedule price shall include the necessary bailing or pumping. Solid rock in such foundations will be paid for at a rate of three times that given in schedule, item 4.'

According to this paragraph, all material excavated should be paid for at the schedule price per cubic yard, with the one exception of solid rock. Please ask your chief engineer to give his views on this point.

I am, sir, your obedient servant,

The Secretary, N. T. Railway. FREDERICK HAYTER, *for A.G.*

CHIEF ENGINEER'S OFFICE, OTTAWA, July 27, 1908.

DEAR SIR,—In order to enable you to reply to the Auditor General's letter of the 23rd instant *re* loose rock in foundations, para. 41 of our general specifications, I may say that I wrote our district engineer at Quebec on the 9th instant, telling him that no change should be made in clause 41 of the general specifications for east of the St. Lawrence river, and that the only classification that can be given is solid rock or other material. In regard to the J. D. McArthur contract in district 'F,' and those of Messrs. M. P. & J. T. Davis and Messrs. Macdonell & O'Brien, west of the St. Lawrence, the specifications then used made no provision in such foundations for solid rock, and in justice to the contractors I am allowing the same rate to prevail as in the subsequent contracts in which the specifications were amended.

Yours truly,

Secretary, N. T. Ry. Com. HUGH D. LUMSDEN, *Chief Eng.*

AUDIT OFFICE, OTTAWA, July 30, 1908.

SIR,—Your letter of the 28th instant in reply to mine of the 23rd is received, with inclosure of copy of Mr. Lumsden's letter dated 27th, in which he agrees that, under paragraph 41 of the general specifications, excavation of foundations should be classified only as solid rock or other material. Will you, therefore, please arrange for re-classification of the following items, paid in the April, 1908, estimates at three times the schedule price of loose rock, item 5:—

J. D. McArthur: 650 c. y. 'loose rock under water,' at $1.80 = $1,170.

M. P. & J. T. Davis (east of the St. Lawrence): 251 c. y. 'loose rock in foundations,' at $1.95 = $489.45.

I am, sir, your obedient servant,

The Secretary, N. T. Ry. FREDERICK HAYTER, *for A.G.*

CHIEF ENGINEER'S OFFICE, OTTAWA, August 7, 1908.

DEAR SIR,—In regard to the Auditor General's letter to you of the 30th of July, I may say that, as far as the 650 c. y. (loose rock under water) at $1.80 per c. y. is concerned, this was not for work in foundations, but for work carried out under special arrangements made by me with various contractors for cases where, owing to the location of structures, excavation in diversion of waterways becomes necessary and such excavation is under water which cannot be drawn off. A copy of this agreement I attach. Where this has been allowed in error in foundations it will be corrected.

Yours truly,

The Secretary, N. T. Ry. Com. HUGH D. LUMSDEN, *Chief Eng.*

AUDIT OFFICE, OTTAWA, August 10, 1908.

SIR,—Your letter of the 8th instant replying to mine of the 30th ultimo is received, together with copies of Mr. Lumsden's letter dated the 7th instant and the agreement between J. D. McArthur and Mr. Lumsden, dated 17th March, 1908, fixing the prices to be paid for excavation under water in diversion of waterways.

It would perhaps be well for copies of all such agreements (made under paragraph 11 of the contract) to be sent to this office; otherwise further misunderstanding and unnecessary correspondence may result when checking the progress estimates.

It is noted that correction will be made where this rate of three times the schedule price of loose rock (item 5) has been allowed for excavation in foundations.

I am, sir, your obedient servant,

The Secretary, N. T. Railway. FREDERICK HAYTER, *for A.G.*

Grand Trunk Pacific Railway: Supervision of Government Work.

AUDIT OFFICE, OTTAWA, November 28, 1907.

SIR,—I beg to call your attention to paragraph 7 of the agreement in schedule of the National Transcontinental Railway Act, which states in substance that the eastern division is to be built under joint supervision of government and company; and in this connection I would respectfully ask if the certificate of the chief engineer of the Grand Trunk Pacific Railway Company is being procured as the work progresses.

I am, sir, your obedient servant,

The Secretary, N. T. Ry. Com. J. FRASER, *A.G.*

OTTAWA, November 29, 1907.

DEAR SIR,—I have the honour, by direction of the board, to acknowledge the receipt of your letter of the 28th instant, calling attention to paragraph 7 of the agreement, being the schedule to the National Transcontinental Railway Act, and to advise you in reply that the interpretation of the said paragraph has received the very careful consideration of the commissioners, and that the work is being carried on accordingly.

I am, sir, your obedient servant,

J. Fraser, Esq., Auditor General. P. E. RYAN, *Secretary,*

Grand Trunk Pacific Railway: Government Director.

AUDIT OFFICE, OTTAWA, November 9, 1907.

SIR,—Let me acknowledge receipt of your application No. 276 for $1,000 in favour of Mr. Alfred Brunet, for six months services ending September 30, 1907, as director of the Grand Trunk Pacific Railway Company.

There should, I think, be some certificate that the services have been rendered.

Perhaps the assistant accountant, Mr. Graham Bell, on his periodical visits to Montreal to examine the vouchers for expenditure west of Winnipeg, might inspect the attendance records of the Board of Directors, and certify that Mr. Brunet's name is found therein.

The application is returned herewith.

I am, sir, your obedient servant,

The Deputy Minister, Railways and Canals. J. FRASER, *A.G.*

MONTREAL, May 22, 1908.

DEAR SIR,—In accordance with our conversation, in your office, on the 15th inst., I beg to inclose you, herewith, a letter received this day, from the secretary of the Grand Trunk Pacific Railway Company.

The G.T.P.R. were only advised of my nomination late in August, 1906, and, therefore, I was not notified of the meeting held on the 31st of July, 1906. I, thereabout, requested the secretary of the private council to officially advise the company of my nomination; which he did in the course of August, 1906.

I did not attend meetings of February 7, 1907 and December 5, 1907, being ill and confined to my house.

Hoping that this will be satisfactory to you, I beg to remain,

Yours very truly,

The Auditor General. ALF. BRUNET.

GRAND TRUNK PACIFIC RAILWAY, MONTREAL, May 21, 1908.

DEAR SIR,—Replying to yours of May 20th, making inquiry as to the number of meetings of the board of directors of this company which have been held since your appointment by the government as a director, and the number of meetings you have attended, will say:

The order in council making your appointment is dated July 20, 1906, since which time the following meetings of the board have been held, and attended by you as indicated:—

July 31, 1906.
November 8, 1906, present, Alfred Brunet.
December 6, 1906, present, Alfred Brunet.
January 3, 1907, present, Alfred Brunet.
February 7, 1907.
May 15, 1907, present, Alfred Brunet.
July 4, 1907, present, Alfred Brunet.
August 1, 1907, present, Alfred Brunet.
December 5, 1907.
January 2, 1908, present, Alfred Brunet.
April 16, 1908, present, Alfred Brunet.

Making a total of eleven meetings held, at eight of which you were present.

Yours truly,

Alfred Brunet, Esq., Montreal. HENRY PHILIPS, *Secretary.*

Paragraph 41, General Specifications.

AUDIT OFFICE, OTTAWA, July 30, 1908.

SIR,—In the general specifications of the contracts of J. D. McArthur, District B, and Hogan & Macdonell, District B, (sub-let to M. P. & J. T. Davis and Macdonell & O'Brien), paragraph 41 provides that 'excavation for foundation pits, including those excavated under water, but not requiring caissons, coffer-dams or other special appliances, shall be paid for at the schedule price per cubic yard excavated, such excavation to be kept dry, and the schedule price shall include the necessary bailing or pumping.'

In the amended general specifications as used in all of the subsequent contracts, this paragraph 41 contains the following additional provision: 'Solid rock in such foundations will be paid for at a rate of three times that given in schedule, item 4.'

In Mr. Lumsden's letter to you, dated 27th instant, he states that, in justice to the contractors (above mentioned), he is allowing the same rate to prevail as in the subsequent contracts in which the specifications were amended. Would not this action by the chief engineer constitute a variation of the contract as approved by order in council and the G. T. P. Ry. Co.? And would it not, therefore, require the authority of the Governor in Council and sanction of the G. T. P. Ry. authorities before it could become legally effective?

I am, sir, your obedient servant,

The Secretary, N.T.Ry., Ottawa. FREDERICK HAYTER, *for A.G.*

AUDIT OFFICE, OTTAWA, October 17, 1908.

SIR,—Let me call your attention to our letter of July 30 last, regarding the interpretation of paragraph 41 of the general specifications as used in the McArthur and Hogan & Macdonell contracts.

No answer appears to have been received to the letter in question.

I am, sir, your obedient servant,

The Secretary, N.T.Ry., Ottawa. FREDERICK HAYTER, *for A.G.*

THE COMMISR'S OF THE TRANSCONTINENTAL RY., OTTAWA, November 20, 1908.

DEAR SIR,—In reply to your letters of July 30 and October 17 last, with respect to payments to contractors J. D. McArthur, M. P. & J. T. Davis and Macdonell & O'Brien for excavation in foundations, I have the honour to hand you herewith a copy of a letter from our law clerk, dated the 20th instant, which speaks for itself.

Your obedient servant,

The Auditor General. P. E. RYAN, *Secretary.*

THE COMMISR'S OF THE TRANSCONTINENTAL RY., OTTAWA, November 20, 1908.

SIR,—In regard to letter of 17th ultimo, from Mr. Hayter of the Auditor General's Office, and attached correspondence, I beg to report:

That the chief engineer, on finding that the price for excavating solid rock in foundations was not provided for in the contracts mentioned in Mr. Hayter's letter, considered that under the powers given him by sections 11 and 35, of said contracts he had the authority to have the work performed and fix the price by agreement with the contractors, at the same rate as in subsequent contracts where paragraph 41 of the specifications was amended.

The powers of the chief engineer are, I should think, broad enough to admit of this being done without the authority of the Governor in Council and the Grand Trunk Pacific Railway Company.

Yours very truly,

The Secretary, Transcontinental Ry. H. ATKINSON, *Law Clerk.*

AUDIT OFFICE, OTTAWA, December 9, 1908.

SIR,—In the general specifications of the contract with Hogan and Macdonell on District B of the Transcontinental Railway, paragraph 41 provides that 'excavation for foundation pits, including those excavated under water, but not requiring caissons, cofferdams or other special appliances, shall be paid for at the schedule price per cubic yard excavated, such excavation to be kept dry, and the schedule price shall include the necessary bailing or pumping.'

The rate to be paid comes under items 7 and 8 in the schedule: 'No. 7—excavation in foundations, no coffer-dams, c. yd. $1. No. 8—excavation of foundation, within coffer-dams, $1.75 c. yd.' (See page 22 of specifications.)

In amended specifications for subsequent contracts, paragraph 41 contains the following additional provision: 'Solid rock in such foundations will be paid for at a rate of three times that given in schedule, item 4.' Item 4 reads: 'Solid rock c. yd. $1.50.' Three times this rate would be $4.50 per cubic yard.

The law clerk of the Transcontinental Railway has given his opinion that the chief engineer has power given him by sections 11 and 35 of the contract, to fix the price by agreement with the contractor at the same rate as in subsequent contracts where paragraph 41 of the earlier specification was amended. I contend that he has not the power under those sections to depart from the specifications under which the contract was entered into.

I inclose herewith copies of the correspondence with the National Transcontinental Commission, and have to request that you advise me as to whether or not the chief engineer has the power to make this alteration in the contract.

I am, sir, your obedient servant,

The Deputy Minister of Justice. J. FRASER, *A.G.*

Re **Arrears due on Welland Canal.**

AUDIT OFFICE, OTTAWA, December 19, 1907.

SIR,—In the *Hansard* of the 18th, page 889, it is recorded that a motion of Mr. Lalor's was passed for a copy of the report of the Hon. Justice James Henry Madden, on the arrears for rentals on certain leases at Dunnville, Welland canal feeder.

I have to ask that a copy of this report may be furnished to this office.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

Re **Canals Revenue.**

AUDIT OFFICE, OTTAWA, January 11, 1908.

SIR,—I beg to call your attention to the fact that the collector of canal revenue at Montreal, F. St. Germain, does not deposit his receipts as promptly as is required by the Treasury Board regulations. He should be instructed to deposit daily, or as frequently as he has $25 or upwards on hand.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

DEPT. RAILWAYS AND CANALS, OTTAWA, January 18, 1908.

SIR,—Referring to your communication of the 11th instant, stating that Mr. F. St. Germain, agent of the department at Montreal, is not depositing the receipts in respect of the revenue collected by him on its behalf at that point as promptly as is required by the Treasury Board regulations in that regard, and advising that he should deposit daily, or as frequently as he has $25, or upwards, on hand, I have the honour to say that the department is advised, under date the 15th instant, by Mr. St. Germain, that, in the future he will deposit the receipts referred to in the manner indicated by you.

I am, sir, your obedient servant,

The Auditor General. L. K. JONES, *Secretary.*

AUDIT OFFICE, OTTAWA, January 14, 1908.

SIR,—Upon examination of the returns and counterfoils of Geo. Bourgouin, statistical officer, St. Lawrence canal, Montreal, I find that a large number of receipts are dated some months on only one day and on never more than two days of the month, and that the deposits in acquittance bear the same dates, viz.:—

May 11, 1907, receipts issued Nos. 17511 to 17561.. ..	$ 734 34
May 28, 1907, receipts issued Nos. 17562 to 17578..	586 27
June 12, 1907, receipts issued Nos. 17579 to 17605..	1,068 73
July 9, 1907, receipts issued Nos. 17606 to 17645..	1,611 78
July 30, 1907, receipts issued Nos. 17646 to 17680..	1,312 46
August 10, 1907, receipts issued Nos. 17681 to 17694.. ..	578 83
September 6, 1907, receipts issued Nos. 17695 to 17730. ..	1,329 79
September 24, 1907, receipts issued Nos. 17731 to 17766..	1,933 16
October 9, 1907, receipts issued Nos. 17767 to 17807.. ..	1,203 86
October 24, 1907, receipts issued Nos. 17808 to 17830..	1,032 93
November 11, 1907, receipts issued Nos. 17831 to 7857..	1,260 82
November 27, 1907, receipts issued Nos. 17858 to 17885..	883 23

I should be glad to have an explanation in connection therewith.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

DEPT. RAILWAYS AND CANALS, OTTAWA, January 29, 1908.

SIR,—Referring to your communication of the 14th instant, in the above matter, stating that, on examination of the returns and counterfoils of the statistical officer of the Quebec canals in the city of Montreal, you find that a large number of receipts are dated some months on only one day, and on never more than two days of the month, and that the deposits in acquittance bear the same dates; you enumerating the numbers of the receipts, &c., referred to, and asking for an explanation, I have the honour to say that the department is advised, under date the 25th instant, by the superintending engineer of the said canals that the above mentioned statistical officer explains that for some time he has been in the habit of making deposits only when a pretty large number of cheques had been collected, and that he considered it proper to make the date of each receipt correspond with the date of the deposit. The superintending engineer adds, however, that he has instructed the officer referred to that, in the future, he is to make deposits daily, or as soon as collection is made; that he is not to change any date on the counterfoils of the receipts given by him, and that such counterfoils are to be an exact and accurate copy of the original receipt.

I am, sir, your obedient servant,

The Auditor General. L. K. JONES, *Secretary.*

AUDIT OFFICE, OTTAWA, February 1, 1908.

SIR,—The statistical officer of the St. Lawrence canal, Montreal, issues a large number of receipts monthly on account of wharfage, storage, harbour dues, &c., which are only summarized under the above headings in his account current.

I therefore beg to suggest that he be instructed to furnish with the account current, a detailed statement of his collections, which would facilitate the examination of this account.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

DEPT. RAILWAYS AND CANALS, OTTAWA, February 5, 1908.

SIR,—I have to acknowledge the receipt of your communication, dated the 1st instant, in the above matter, whereby you ask that certain instructions be issued to the statistical officer at Montreal, Que., in connection with the receipts issued by him.

I am, sir, your obedient servant,

The Auditor General. L. K. JONES, *Secretary.*

Re **House Rents, Port Dalhousie.**

AUDIT OFFICE, OTTAWA, April 29, 1908.

SIR,—It is found upon examination of the receipts of 1907-8, issued by the collector of canal revenue at Port Dalhousie, that all the tenants appear to be in arrears for house rents, viz.:—

Tenant—

A. Atkinson, rent paid to September 30, 1907.
Wm. Comarford, rent paid to January 24, 1908.
J. Commerford, rent paid to November 30, 1907.
M. Considine, rent paid to September 15, 1907.
D. Lane, rent paid to November 30, 1907.
E. McBrien, rent paid to December 31, 1907.
Wm. Ross, no dates given on the receipts.
Geo. Smith, rent paid to February 28, 1907.
Fred. Townsend, rent paid to July 7, 1907.
W. Watchburg, rent paid to September 15, 1907.
Jos. Whiteclou, rent paid to November 15, 1907.

I have to inquire if these persons are still in occupancy, and if any steps have been taken to collect the arrears, and to have the rents paid promptly in the future?

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

Re **Harbour Dues, Montreal.**

AUDIT OFFICE, OTTAWA, April 25, 1908.

SIR.—I should be glad to have an explanation of the small sum collected on account of harbour dues at Montreal during the last fiscal year. In 1906-7 (only 9 months) the collections were $2,268.82, while for 1907-8 (12 months) they amount to $1,484.06.

It is observed that all the other services, viz., wharfage, storage, wood dues and winterage, show an increase over the year 1906-7.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

DEPT. RAILWAYS AND CANALS, OTTAWA, May 16, 1908.

SIR,—I have the honour to acknowledge the receipt of your communication of the 25th ultimo, in the above matter, in which you make certain remarks in that regard, and ask for an explanation as to the small sums collected on account of harbour dues at Montreal during the last fiscal year.

In reply, I have to say that the departmental revenue on account of harbour dues at the point in question is derived, principally, from vessels loaded with coal coming up from the harbour into the Lachine canal basins, and that this class of traffic is comparatively small, and of an uncertain character; that the revenue derived from a single vessel generally amounts to about $150 or $200, so that it will be readily seen that about twelve vessels would account for the revenue of $2,268.82 in 1906-7, and that the lesser amount collected in 1907-8 is accounted for owing to the fact that a smaller number of vessels entered the basins from the harbour, it, evidently, having been found more convenient to unload in the harbour.

I am, sir, your obedient servant,

The Auditor General. L. K. JONES, *Secretary.*

Re **Freight in Store at Metapedia.**

MONCTON, N.B., December 26, 1907.

DEAR SIR,—I send you herewith a letter from Mr. S. L. Shannon, dated the 19th instant, in regard to an amount outstanding against Metapedia station, of $480.16, being charges on 16 cars of piles which have been lying at that station since November, 1898. I wrote to Mr. J. L. McDougall, on June 28, 1905, in regard to this amount outstanding against this station, a copy of which letter I inclose herewith. Will you please consider the matter, and let me know whether or not, under the circumstances, it would be advisable to have the amount written off the books.

Yours truly,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

AUDIT OFFICE, OTTAWA, December 30, 1907.

SIR,—I have received your letter of the 26th instant, in reference to an item of outstanding charges at Metapedia, and inquiring if it should not be written off.

Your letter of June 28, 1905, was received during the absence of the clerk in charge of revenue audit, and was overlooked.

I consider it a mistake to keep agents' accounts loaded up with items such as this. Under existing regulations no account due to the government can be written off without the authority of parliament, on the recommendation of the Public Accounts Committee. So you can only transfer this item from the agents' account to general ledger account under whatever heading you keep such uncollected items.

Your attention was called to this outstanding March 20, 1902, and in your reply of January 27, 1903, you stated that some of the piles had been used, and that any others fit for use would be used during the coming season.

You wrote again January 7, 1904, that there were still some on hand, and when work began in the spring you would endeavour to use some more of them.

It does not seem, however, that any were used during either 1903 or 1904.

I am, sir, your obedient servant,

The Gen. Mgr., Government Railways. J. FRASER, *A.G.*

Re **Intercolonial Railway Revenue—Cashier's Office.**

AUDIT OFFICE, OTTAWA, February 10, 1908.

SIR,—Referring to our correspondence in August last, in connection with the practice of your cashier in holding a large amount of currency in his vault each night, I would again ask your further consideration of the matter.

A clerk of this office who recently visited the Customs port of Montreal, informs me that the total collections each day reaches the bank before 6 o'clock each evening. The cash deposit is made up, put in a locked box and carried to the bank where, by arrangement a clerk remains to receive it. The next morning the Customs clerk goes to the bank, unlocks the box in the presence of the teller or his representative, who then counts it and gives a deposit receipt therefor.

No doubt if you were to discuss the matter with the manager of the bank, some arrangement could be made that would be preferable to the present practice.

Apart from the objection of carrying so much money in your vault over night, it must be considered that there is no close check on your cashier as long as the present practice is continued.

I am, sir, your obedient servant,

The Gen. Mgr., Government Railways. J. FRASER, *A.G.*

MONCTON, N.B., February 29, 1908.

DEAR SIR,—I received and acknowledged your letter, dated February 10, with reference to I.C.R. revenue and the cashier's office.

I inclose you copy of the correspondence that has passed between myself and Mr. Shannon, and Mr. Shannon and Mr. Clark, manager of the Bank of Montreal, Moncton, in regard to this matter.

You will observe by the letter of Mr. Clark to Mr. Shannon of February 24, that the general manager of the Bank of Montreal, to whom the request was submitted, considers that it is unreasonable and therefore should be declined.

Yours truly,

The Auditor General. D. POTTINGER, *Gen. Mgr.*

MONCTON, N.B., February 25, 1908.

DEAR SIR,—I have to acknowledge receipt of your communication of the 14th instant, inclosing a letter from the Auditor General, in which letter he suggests a mode in which it can be arranged to avoid the holding of a large mount of currency in the cashier's vault over night, and explaining a similar arrangement that is in force with the Customs at the port of Montreal; and asking me to look into this, and to take the matter up with the Bank of Montreal to see if something can be arranged that will meet the Auditor General's wishes in this respect.

I inclose you herewith a copy of my letter to the manager of the Bank of Montreal at Moncton, dated 18th instant; also a copy of the manager of the Bank of Montreal's letter to me of the 20th instant in reply to mine, stating that as the carrying out of the proposal would create a great deal of inconvenience to his staff he has referred the matter for consideration to the general manager. I also inclose you a copy of a letter from the manager of the Bank of Montreal, dated 24th instant, in which he states that he has received instructions from the general manager, in reply to the letter he wrote him asking if this matter should be considered.

You will notice that the general manager considers the request to be unreasonable, and points out that the circumstances in connection with the Customs deposit at Montreal are altogether different from the circumstances at Moncton.

I return you herewith the Auditor General's letter.

Yours truly,

The Gen. Mgr., Government Railways. S. L. SHANNON, *Comptroller.*

BANK OF MONTREAL, MONCTON, N.B., February 20, 1908.

DEAR SIR,—I beg to acknowledge receipt of your letter of 18th inst., *re* depositing with bank each day between 5.30 and 6.30 p.m., so as to avoid your cashier's holding over currency in his vault each night.

The carrying out of the proposal would create a great deal of inconvenience to our staff, and I am referring consideration of the matter to the general manager, and will advise you of his reply.

Yours truly,

The Comptroller, I.C.R. R. CLARK, *Manager.*

MONCTON, N.B., February 18, 1908.

DEAR SIR,—The general manager has forwarded to me a communication which he has received from the Auditor General of Canada, in connection with the practice of our cashier holding a large amount of currency in his vault each night. He suggests that the cash should be made up at the end of the day and conveyed to the Bank of Montreal, and that an arrangement should be made with your bank to have a clerk remain to receive it. He instances the method adopted by the Customs Department at the port of Montreal, where the total collections of each day reach the bank by six o'clock in the evening, and that the cash deposit is made up, put in a locked box, and carried to the Bank of Montreal and handed in. The next morning the Customs clerk goes to the bank and unlocks the box in the presence of the teller or his representative, who then counts the contents and gives a deposit receipt therefor.

Will you please inform me if your bank is willing to make such arrangements whereby it will be possible for our cashier to make his deposit at your bank between the hours of 5.30 and 6.30 p.m. daily. This would, of course, mean all holidays as well as ordinary days.

Yours truly,

R. Clark, Esq., Mgr. Bank Montreal, Moncton. S. L. SHANNON, *Comptroller.*

BANK OF MONTREAL, MONCTON, N.B., February 24, 1908.

DEAR SIR,—Referring to your letter of 18th inst., *re* deposits by your cashier. I am instructed by the general manager to say in reply that he considers the request to accept deposits between the hours of 5.30 and 6.30 p.m. unreasonable, and therefore it should be declined. The general manager points out that the circumstances under which deposits are received from the Customs House at Montreal are altogether different. Our staff at Montreal being a large one, and as the duties of some senior officers necessitates their presence in the office late in the afternoons, it does not necessitate the detention of two senior officers for the express purpose of receiving the Customs deposit.

In connection with this matter, I would beg to point out to you that the cash deposits received from your cashier average only $3,500 per day, and that the custody of this amount in your cashier's safe appears reasonably safe. There would be no risk attached to cheques and drafts.

Yours truly,

The Comptroller, I.C.R. R. CLARK, *Manager.*

AUDIT OFFICE, OTTAWA, March 6, 1908.

SIR,—I inclose you copy of correspondence with the general manager in reference to cashier's office at Moncton.

The present practice is that all the receipts of each day are retained in the vault over night and deposited about noon the following day.

It seems desirable that as little cash as possible should be held over night in the vaults, and in this opinion the general manager concurs.

The Comptroller seems to think that no improvement can be made in the present practice. I do not agree with him. There is no reason why the deposit should not be made later each day, and that all the cash on hand at the time should be deposited. If thought advisable two deposits might be made at the same time, one to cover the balance of previous day's receipts, the other on account current day.

As a suggestion I called the manager's attention to the practice at Montreal Custom House. You will note the objection to adopt a somewhat similar practice at Moncton comes from the manager of the bank. No doubt the Finance Department could induce him to comply with this arrangement.

In addition to the objection of holding so much cash in the vault over night, there is also the difficulty of keeping a close check on the cashier, as long as the present practice continues.

I have to request your consideration of the question at your early convenience.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

DEPT. RAILWAYS AND CANALS, OTTAWA, March 9, 1908.

SIR,—I am in receipt of your letter of the 6th instant, with which you inclose copies of correspondence had with the general manager of the Intercolonial Railway, relative to the cashier's office at Moncton. I quite agree with you that it is desirable to hold as little cash as possible over night in the vaults at Moncton, but the difficulty seems to be that there is no way in which they can get over the point, the bank evidently refusing to receive the cash after the hour of its arrival at Moncton.

I cannot see that there should be the slightest difficulty in keeping check on the cashier; although, of course, the possibilities of burglary are greater in the railway office than they would be in the bank. I will write Mr. Shannon about the matter, and see if any possible solution can be worked out that would be in accordance with your views.

I am, sir, your obedient servant,

The Auditor General. M. J. BUTLER, *D.M. R. & C.*

AUDIT OFFICE, OTTAWA, March 12, 1908.

SIR,—I have received your letter of the 9th. You state that you agree with me that it is desirable to hold as little cash as possible over night in the vaults at Moncton, but the difficulty seems to be that there is no way in which they can get over the point.

If no arrangement can be made with the bank to accept the cash box after banking hours, there is still the option of making the deposit as late as possible each day, and then depositing all the funds on hand.

The present practice is to deposit about noon, and at that time the cashier has several thousand dollars on hand of the current day's receipts which he does not deposit till the next day.

You state that you cannot see that there should be the slightest difficulty in keeping check on the cashier. We will suppose he was $1,000 short. What is to prevent him from using $1,000 each day of the current day's receipts to make up his deposit? The only check against that would be an actual counting of his cash.

I am, sir, your obedient servant,

The Deputy Minister of Railways and Canals. J. FRASER, *A.G.*

Canada and Great Britain Steamship Service.

AUDIT OFFICE, OTTAWA, November 5, 1907.

SIR,—I beg to acknowledge the receipt of your application of the 29th ult., for a cheque of $150,866.67 in favour of H. and A. Allan, being the amount of their claim for subsidy for a weekly steamship service between Canada and Great Britain for the quarter ended June 30, 1907.

According to the statement of sailings which you have sent me, compiled from the steamers' logs, the rate of speed called for by the contract was not maintained on all trips during the period covered by the Messrs. Allan's claim. As, however, you state in your application that the full claim has been allowed under clause 12 of the contract, I shall be obliged if you will send me a detailed statement in the form of the statement which you have already sent, and which I inclose herewith, showing the time deduction allowed on each trip; and in case the maximum distance has been allowed between Halifax and Liverpool or Rimouski and Liverpool, or vice versa, the reasons for having allowed it. It seems to me that the conditions and circumstances under which deductions from the full time occupied by each trip from port to port may be made are set forth in clause 12 in such a manner as to preclude any arbitrary deductions to be substituted for the deductions therein provided for.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, November 6, 1907.

SIR,—In compliance with your request of yesterday's date, I hand you herewith statement showing time deductions allowed on each trip of the Allan service covered by application of the 29th ultimo for a cheque in payment to the end of June.

I think this is what you want. In any event I would point out that the last clause in the contract makes the minister the sole judge as to whether the terms have been carried out or not.

I return the statement which you sent over with your letter.

I am, sir, your obedient servant,

The Auditor General. WM. G. PARMELEE, *D.M.*

AUDIT OFFICE, OTTAWA, November 8, 1907.

SIR.—With reference to your letter of the 6th instant and the statement inclosed therein respecting the claim of the Messrs. Allan for the full subsidy provided by contract for the steamship service between Canada and Great Britain during the June quarter, 1907, I beg to say that, owing to the great pressure of work in the office at present preparing the annual report, it is not possible to have the statement and other proofs which have been sent me in support of this claim properly examined at once; and so as not to cause any inconvenience to the contractors, I have passed your application in full, reserving to myself the right to call attention to any defects in the service of the June quarter on the occasion of your next application—that for the quarter ended September, 1907.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

Note by A.G.—Deductions amounting to $14,395.60 were made during fiscal year 1907-8.

Petit de Grat and Intercolonial Railway Terminus at Port Mulgrave Subsidy.

AUDIT OFFICE, OTTAWA, April 15, 1908.

SIR,—I have the honour to acknowledge the receipt of your application of the 13th instant for a cheque of $750 in favour of Hugh Cann and Son, being March quarter, 1908, subsidy for steamship service between Petit de Grat and the Intercolonial Railway terminus at Port Mulgrave.

According to the vouchers sent me in support of your application, only 66 trips of the 78 called for by the contract were performed, owing, it would appear, to stormy weather and ice. In addition to the memoranda to this effect on the clearance papers of the various collectors of customs connected with this service, I should like to have a letter from yourself in explanation of the missing trips and explicitly approving of the payment of the full subsidy notwithstanding the incomplete service rendered.

I am, sir, your obedient servant,

F. C. T. O'Hara, Esq., Acting Deputy Minister. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, April 16, 1908.

SIR,—I beg to acknowledge the receipt of your letter of April 15, with reference to our application for a cheque for $750 in favour of Messrs. Hugh Cann & Son for the quarter ended March 31, 1908, being subsidy for steamship service between Petit de Grat and the Intercolonial Railway terminus at Port Mulgrave. I note you wish a specific statement from this department approving of the payment in full notwithstanding the incomplete service rendered.

I have to state that this department is satisfied with the claims sent you, in view of the statements made by the collectors of customs that certain trips were missed on account of heavy gales and ice. It does not seem reasonable to expect this company to be able to perform every trip during those three months, so I will be glad if you will kindly issue payment in the usual way.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *A.D.M.*

Port Mulgrave and Guysboro and Port Mulgrave and Canso.

DEPT. OF TRADE AND COMMERCE, OTTAWA, April 22, 1908.

SIR,—With further reference to our request of the 15th inst. for cheque for $2,500 in favour of Hugh Cann & Son, being six months' subsidy on above route to March 31 last, I beg to say that in view of the customs certificates supplied with reference to the detentions by gales and ice, this department is satisfied that the service was performed as efficiently as possible under the circumstances and the subsidy earned.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *A.D.M.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, April 22, 1908.

SIR,—With reference to our request of the 15th inst. for cheque for $2,000 in favour of Hugh Cann & Son, being six months' subsidy on above route to March 31 last, I beg to say that in view of the customs certificates supplied with reference to the detentions by gales and ice, this department is satisfied that the service was performed as efficiently as possible under the circumstances and the subsidy earned.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *A.D.M.*

Charlottetown and Newfoundland, via Cape Breton Ports.

AUDIT OFFICE, OTTAWA, September 7, 1907.

SIR,—With reference to your application of the 29th ult., for a cheque of $3,000 in favour of the Dominion Coal Company, being subsidy claimed by the company under a contract dated April 24, 1907, for a steamship service between Charlottetown and Newfoundland, via Cape Breton ports, to June 30, 1907; I beg to call your attention to the omission of any call at Charlottetown on the return voyage from St. John's, Newfoundland.

The authority for the subsidy for this service is recited in the Supply Bill of 1907-8 as 'Steam communication between Prince Edward Island, Cape Breton and Newfoundland,' whereas the service performed by the Dominion Coal Company has been from Montreal to St. John's, calling on the outward voyage only at Charlottetown. Though the service so performed seems to be all the contract calls for, it seems to me it is not a service, so far as Prince Edward Island is concerned, as complete as Parliament intended to provide. In view of this fact I do not feel justified in certifying to the issue of the cheque you ask for, in the absence of any explanation of the apparent incompleteness of the service called for by the parliamentary appropriation.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, October 3, 1907.

SIR,—I beg to acknowledge the receipt of your letter of September 7th, in reference to the steamship service between Charlottetown and Newfoundland, for which application for a cheque to the amount of $3,000 was made under date of August 29.

You are correct in the statement that the vote for the service reads 'Steam communication between Prince Edward Island, Cape Breton and Newfoundland,' but there is information in this department to the effect that it seemed impossible to get any steamship company to perform the service exactly in the terms of the vote; and rather than have no service at all, and at the urgent request of representative persons in Prince Edward Island, an arrangement was entered into with the Dominion Coal Company to call at the Island and take whatever cargo was offering for Newfoundland, on their regular trips from Montreal. There is no return cargo from Newfoundland to Prince Edward Island, and you will note that therefore the contract does not read calling *both* ways at Charlottetown.

It was hoped when the contract was drawn that calls could be made at Souris, but this was contingent upon dredging to permit of the necessary depth of water

with that end in view. The department is just informed, however, that there is more work than was expected, and it is not finished yet and will not be for some months to come.

No complaints are recorded upon our file against the service performed by this company at the present time. There were some complaints, but they have since been withdrawn, satisfactory explanations having been given.

I will be glad, therefore, if you will kindly issue cheque in due course.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *A.D.M.*

Canada and Mexico Steamship Subsidy.

AUDIT OFFICE, OTTAWA, October 3, 1907.

SIR,—With reference to your application of the 28th ulto. for a cheque of $4,166.66 in favour of Elder Dempster & Co., for one trip of the steamer *Bornu* between Canada and Mexico, I beg to call your attention to the evident omission of the necessary calls, under the contract, at the ports of Nassau, Havana and the Mexican ports, on the return trip.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, October 7, 1907.

SIR,—Referring to your letter of October 3, I beg to send you herewith a copy of a communication just received this morning from Messrs. Elder Dempster & Co., which I trust will be satisfactory.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *A.D.M.*

MONTREAL, October 5, 1907.

DEAR SIR,—In reply to your letter of the 4th inst., it was never intended that our steamers should call at Havana or Nassau on the north-bound voyage, and this clause in the last contract was omitted. I cannot understand how it was overlooked in the contract just drawn up by Mr. Parmelee.

When the contract was originally made the clause was inserted that we should call at Havana and Nassau on the north-bound voyage, but Mr. Parmelee wrote the Auditor General that this was at the option of the contractors, and the matter was then arranged.

The Auditor General is aware that the Mexican government are paying the subsidy for the north-bound voyage and, therefore, they would object to our calling at Havana, and they did so at the commencement of the service.

When any cargo is offering at Nassau we will call there, but up to the present there has been nothing to ship. The *Sokoto*, this voyage is calling there for orders, as we expected to get from 3,000 to 4,000 boxes of oranges, but we have just received a wire that there will be nothing to ship until November.

As it was not the minister's intention that we should call at the said ports on the north-bound voyage, I think it will be well to get the minister to write a letter stating the facts, or perhaps it would be better for me to write to the Auditor General.

I am, yours very truly,

F. C. T. O'Hara, Esq., Acting Deputy Minister. D. W. CAMPBELL.

AUDIT OFFICE, OTTAWA, October 9, 1907.

SIR,—I have the honour to acknowledge the receipt of your letter of the 7th inst., inclosing copy of a letter received at the department from Mr. D. W. Campbell, in explanation of the omission of the calls by the steamer *Bornu* on the homeward trip, at Nassau and Havana, &c., as provided for in the contract for the Canada, Mexico (Atlantic) service.

In view of the statement made by Mr. Campbell, that the provision for these calls was inserted in the contract in error, I should like to have a letter from the department corroboratory of Mr. Campbell's statement.

I am, sir, your obedient servant,

F. C. T. O'Hara, Esq., Acting Deputy Minister. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, October 25, 1907.

SIR,—With reference to your letter of October 9, calling attention to the omission of the necessary calls under the contract of the steamer *Bornu* at the ports of Nassau and Havana, I beg to state that there appears to be an error in the contract. In the beginning I drafted the original contract which, as you may remember, provided for a service to Cuba to be extended to Mexico under certain conditions. Afterwards when it was extended to Mexico the calls at Cuba were maintained, but it developed that the Mexican government would not pay subsidy to a line of steamships calling at Cuba for Cuban cargo which would compete with Mexican products in the Canadian market. It has all along been the intention of this department to provide an export service really to Mexico, and of course to Cuba, and perhaps to Nassau, though at the latter point the trade is really not sufficient to require the steamships to call there to and fro. However, it has been well understood all along that the steamships were not to call at Cuba on return trips to Canada. As a matter of fact it is indifferent from the standpoint of Canadian interests whether they call at Cuba on the trip up from Mexico, or not.

I trust, therefore, you will issue cheque in favour of Messrs. Elder Dempster & Company without further delay.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *A.D.M.*

Halifax, St. John and London Subsidy.

AUDIT OFFICE, OTTAWA, May 4, 1908.

SIR,—With reference to your application of the 30th ultimo, for a cheque of $12,500 in favour of Furness Withy & Co., for steamship service between St. John, Halifax and London, I beg to request that you cause to be sent me a certificate from

the proper officer of the Department of Agriculture as to the fulfilment by the company of the provisions of the contract respecting the accommodation to be provided on the steamers in regard to proper ventilation and the refrigerating plant.

I am, sir, your obedient servant,

F. C. T. O'Hara, Esq., Acting Deputy Minister. J. FRASER, *A.G.*

Dept. of Trade and Commerce, Ottawa, May 21, 1908.

Sir,—With reference to your letter of the 4th May, I beg to state that I communicated with the Deputy Minister of the Department of Agriculture, and I now have his reply as per inclosed copy, together with a copy of the letter from the Commissioner of Dairy and Cold Storage, which I presume will meet your requirements.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *A.D.M.*

Dept. of Agriculture, Deputy Minister's Office, Ottawa, May 20, 1908.

Sir,—On receipt of your letter of the 6th inst., inclosing a copy of a communication from the Auditor General, with respect to obtaining a certificate from the proper officer of this department, as to the fulfilment, by the Furness-Withy Co., of the provisions of the contract respecting accommodation to be provided on their steamers in regard to proper ventilation and refrigerating plant, I referred the matter to the Dairy and Cold Storage Commissioner, and I now beg to inclose you the reply received from that officer.

Your obedient servant,

The Deputy Minister of Trade and Commerce. GEO. F. O'HALLORAN, *D.M.*

Department of Agriculture,

Branch of the Dairy and Cold Storage Commissioner, Ottawa, May 18, 1908.

Dear Sir,—I beg to acknowledge your letter of the 8th inst., covering a letter to you from Mr. F. C. T. O'Hara, Acting Deputy Minister of Trade and Commerce, in respect to the St. John-Halifax-London steamship service, and a copy of a letter from the Auditor General to the Department of Trade and Commerce asking for a certificate from an officer of this department as to the fulfilment by the steamship company of the provisions of the contract respecting the accommodation to be provided on the steamers, in regard to proper ventilation and refrigerating plant.

In reply I beg to state that our thermograph records ex the steamers *Rappahannock* and *Florence,* which sailed from Halifax on September 17 and 27, respectively, showed rather high temperatures, and in each case, on receipt of the records, a letter was sent to the company from this office, complaining of lack of ventilation in these two ships. In reply the company stated that the *Florence* was not one of the contract steamers, but that they would install additional ventilation on both these boats, and our reports show that since October 20 each steamer carrying apples was fitted with additional temporary ventilators in the shape of latticed trunkways running from the top of each hatchway to the bottom of the hold. With the exception of the two shipments referred to, all the cargoes of apples carried from Halifax to London by the Furness line steamers during the season of 1907-8 were discharged in a satisfactory condition.

None of the steamers on the route last season were fitted with a refrigerating plant for the forced circulation of cooled air, but Messrs. Furness, Withy & Co. state that there is absolutely no demand from the shippers in Nova Scotia for cooled air facilities. We have, therefore, suggested that before a new contract is made the Nova Scotia Fruit Growers' Association should be consulted, and if cooled air accommodation is not required this condition should be eliminated from the contract.

Yours very truly,

F. C. T. O'Hara, Esq., Act. Deputy Minister. J. A. RUDDICK, *Commissioner.*

Bank Interest paid at Winnipeg.

AUDIT OFFICE, OTTAWA, July 11, 1908.

SIR,—I beg to ask for explanation of several charges for bank interest, amounting to $54.40, during the fiscal year 1907-8, made by Mr. Horn, chief grain inspector at Winnipeg, in his account of disbursements.

Why were these charges necessary?

I am, sir, your obedient servant,

F. C. T. O'Hara, Esq., Acting Deputy Minister. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, July 13, 1908.

SIR,—I beg to acknowledge the receipt of your letter of the 11th instant, asking for an explanation as to an expenditure of $54.40 during the fiscal year 1907-8, made by Mr. David Horn, chief grain inspector at Winnipeg.

In reply I beg to state that the funds available for this service became exhausted in January last; and the chief grain inspector was in a serious dilemma for funds to continue the grain inspection, which at that period of the year is always a question of moment. Upon consultation with the minister, we decided that the only means at our disposal was to request the Bank of Ottawa at Winnipeg to make an advance to Mr. Horn to meet his monthly accounts. Parliament being then in session, we could not obtain funds by Governor General's warrant, and it would have been awkward to have a special Bill put through both Houses, and have had it assented to by the Governor General.

We required in the vicinity of fifteen to twenty thousand dollars, and as soon as the funds voted at the present session of parliament were available we are to recoup the Bank of Ottawa at Winnipeg.

I am quite aware that this is contrary to regulations, but on the other hand the crippling of this service at that season of the year would have been of a very serious nature

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *A.D.M.*

AUDIT OFFICE, OTTAWA, July 16, 1908.

SIR,—I inclose herewith a copy of a letter received from the Department of Trade and Commerce in reply to an inquiry concerning items amounting to $54.40 for bank interest, appearing in Mr. Horn's accounts.

I was under the impression that instructions had been issued some time ago to the banks forbidding them to make any advances on government account, except in the duly authorized way.

It would appear from this letter that the Bank of Ottawa has not adhered to the instructions given, and that the Department of Trade and Commerce has made, in an irregular manner, certain expenditures for which no parliamentary authority was given.

I am, sir, your obedient servant,

The Deputy Minister of Finance. J. FRASER, *A.G.*

St. John, N.B., and Glasgow, Scotland, Subsidy.

AUDIT OFFICE, OTTAWA, March 10, 1908.

SIR,—I have the honour to acknowledge the receipt of your application of the 7th instant, for a cheque of $9,000, in favour of The Robert Reford Company, Limited, for steamship services during the winter of 1907-8, and two trips in 1906-7, between St. John, New Brunswick, and Glasgow, Scotland.

So far as I can ascertain there is no appropriation in the Supply Bill of the current fiscal year to which the amount claimed for the services of 1906-7 may be charged. There is an appropriation for steam service between St. John and Glasgow, but the period of service is confined to the winter of 1907-8, so that unless there is special provision for 1906-7 I shall not be able to certify to the payment of $1,500, the amount you ask for the service rendered in 1906-7.

I am, sir, your obedient servant,

F. C. T. O'Hara, Esq., Acting Deputy Minister. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, March 11, 1908.

SIR,—I have to acknowledge receipt of yours of the 10th inst., referring to our application for a cheque for $9,000 in favour of The Robert Reford Co., Ltd., for steamship services on the St. John and Glasgow route, and stating that as the appropriation for this service is confined to the winter of 1907-8, you are unable to certify to payment of a portion thereof ($1,500) for two trips for the winter of 1906-7 unless special provision is made therefor, and beg to say that:

As the fiscal year now ends on March 31, each year winter services will not be completed on that date, but about the second week in May, a few trips must necessarily overlap into the next fiscal year, and this will occur continually. It is not proposed to pay the contractors anything more than $15,000 for the full service annually, and it appears to me much more satisfactory to deal with this matter as I have indicated rather than to be constantly year after year obtaining supplementary votes for the trips completed after March 31, the close of the fiscal year.

Many of our annual subsidies are disposed of in this way, the last quarter of one fiscal year being the first quarter paid in next fiscal year, but in no case is the estimate exceeded, and the procedure is satisfactory to all concerned.

I am, sir, your obedient servant,

The Auditor General. WM. G. PARMELEE, *D.M.*

AUDIT OFFICE, OTTAWA, March 13, 1908.

SIR,—I have the honour to acknowledge the receipt of your letter of the 11th inst., with reference to the steamship service between St. John, New Brunswick, and Glasgow, Scotland, performed by The Robert Reford Co., in March and April, 1907, and beg to say that in view of your explanation and the evident intention of the department to include the subsidy for the two trips in question in the appropriation for 1907-8, I have passed your application in full. I think it will be better, though, in future appropriations to include both years or omit the time limitations altogether.

I notice according to the vouchers sent me in support of the sailings for 1907-8, that there was not a regular weekly service, the sailings from St. John having been as follows:—

December, 1907, 6, 15, 29.
January, 1908, 5, 11, 18.
February, 1908, 2, 9, 16, 22.

I trust the contracting company will be able to give satisfactory explanation of this apparent irregularity in the sailings when applying for the final payment on their contract.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, March 19, 1908.

SIR,—Referring to yours of the 13th instant, in *re* the Glasgow service as performed by The Robert Reford Company, in which you point out that two sailings were missed from St. John, one in December and one in January:

The explanation as given by Messrs. Reford, as per copy herewith, I think quite satisfactory.

It is useless for them to run their steamers out empty when they could not get cargo on board at St. John; and in any event we only pay for services actually rendered.

I am, sir, your obedient servant,

The Auditor General. WM. G. PARMELEE, *D.M.*

MONTREAL, March 16, 1908.

DEAR SIR.—Replying to your favour of the 14th inst., file 9915, regarding shortage of two regular sailings in St. John service this winter. The shortages in question are the s.s. *Cassandra,* which was scheduled to sail on December 22, and s.s. *Athenia,* scheduled to sail on January 25, both these steamers sailed from Glasgow for St. John on their regular dates and arrived in due course, but on arrival at that port, owing to the loss of the *Mount Temple* by the C.P.R., the entire terminal facilities of this port were congested by this steamer's cargo, which had been brought forward in expectation of her arrival, even to the cattle, and to assist the situation, it being impossible to get any other tonnage to lift this freight inside of a month, we allowed them to load the s.s. *Cassandra* on their London berth.

The same thing occurred in the case of the s.s. *Athenia,* owing to the non-arrival of the C.P.R. s.s. *Mount Royal,* the entire road being blocked by her cargo at the time.

We were under the impression that you were duly advised of these alterations, but have not been able to locate the record. We really think that the steamers, having made the voyage from Glasgow to St. John, are entitled to a half subsidy for this service. The loading of the steamers at the London berth was greatly in the public

interest, as otherwise, the congestion of this cargo at the port of St. John, where the terminal facilities are at present somewhat limited, it would have meant endless confusion and congestion of all the sailings from that port for the matter of several weeks, whereas, with our Glasgow service weekly, we were able the following week to look after the most important part of the freight and took all the grain that the C.P.R. were able to haul over their road for our account. As a matter of fact since the date of the s.s. *Athenia's* sailing, steamers have, unfortunately, been short of their capacity in varying quantities of 30,000 to 40,000 bushels per steamer. The prospects of the steamers getting grain for the month of April are almost nil.

Yours truly,

The Dep. Minister Trade and Commerce. THE ROBERT REFORD CO., LTD.

Moncton and Petitcodiac River Subsidy.

DEPT. OF TRADE AND COMMERCE, OTTAWA, January 29, 1908.

SIR,—With respect to my application of January 14, requesting a cheque in favour of the Shepody Steam Navigation Company, Limited, for the sum of $2,000, for subsidy for steamship services between Moncton and Petitcodiac river ports to December 1, and Mr. Kearns' note to Mr. Code of the 15th instant, calling attention to the absence of a weekly service to Shulee, I beg to state that I have communicated with the Honourable the Minister of Public Works, and under date of January 28, I am informed that a fortnightly service to Shulee is better than a weekly service, as it leaves the steamer more time for attention to the requirements of other places, and further, that the Shulee people are quite satisfied with the arrangement; and he considers that a fortnightly trip to Shulee during the past season of navigation might well be regarded as sufficient performance of the contract. I have, therefore, to request that you will kindly issue cheque in due course.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *A.D.M.*

AUDIT OFFICE, OTTAWA, January 31, 1908.

SIR,—I have the honour to acknowledge the receipt of your letter of the 29th instant, in explanation of the non-performance, by the Shepody Steam Navigation Company, of the full service called for by contract between Moncton and certain ports on the Petitcodiac river, and beg to say in reply that, so far as I am concerned in the issue of a cheque for the amount asked for in your application, I am not at liberty to certify to payment for any service not in accordance with the provisions of the contract. However, as the service as performed seems to have been as full and satisfactory as that which was intended to be covered by the parliamentary appropriation applicable to the service, I would suggest that the authority of the Governor in Council be obtained for the issue of a cheque for the amount asked for in your application.

I am, sir, your obedient servant,

F. C. T. O'Hara, Esq., Acting Deputy Minister. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, February 1, 1908.

SIR,—I am directed by the Right Honourable the Minister of Trade and Commerce to point out that, under clause 13 which reads 'The Minister may authorize any change or changes in the terms of this contract as may not be inconsistent with the terms of the vote providing for the payment of the subsidy,' he has full power to relieve the contractor from performing a weekly service to Shulee.

I will be glad, therefore, if you will kindly issue the cheque without delay.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *A.D.M.*

AUDIT OFFICE, OTTAWA, February 7, 1908.

SIR,—I have the honour to acknowledge the receipt of your letter of the 1st instant, calling my attention to clause 13 of the contract with the Shepody Steam Navigation Co., under which you claim the Minister of Trade and Commerce is empowered to authorize any change, &c., in the contract not inconsistent with the terms of the vote provided for the payment of the subsidy.

I was aware of this provision in the contract when I wrote you on the 31st ultimo., but in my opinion, the power therein conferred upon the minister is not to be exercised after the service has been performed, but before its commencement by the contractor.

I am still of opinion that I am not at liberty to pass your application unless the service performed and the amount asked in payment therefor are both authorized by the Governor in Council.

I am, sir, your obedient servant,

F. C. T. O'Hara, Esq., Acting Deputy Minister. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, February 8, 1908.

SIR,—I beg to acknowledge receipt of your letter of February 7, with respect to my application of January 14, for a cheque in favour of the Shepody Navigation Co., Ltd., for the sum of $2,000 for steamship services between Moncton and Peticodiac river ports to December 31, 1907.

I note you state that in your opinion the power conferred upon the minister under clause 13 of the contract is not to be exercised after the service has been performed, but before its commencement by the contractors. Your department was aware, according to a communication signed by Mr. Kearns under date of January 15, that there was some correspondence about this point last year. The same point was raised as to weekly trips to Shulee and the explanation given at the time was practically the same as given this year, that is to say, that a weekly service was not necessary and that a fortnightly service was all that was required, and a cheque in payment of the claim was issued.

It was merely an oversight that when the contract was extended the change was not then made, but it will be made in the next contract drawn. In view, therefore, of my previous explanations in connection with this matter, and further, in view of clause 14 as well as clause 13 of the contract, I beg again to ask that you will be good enough to issue the cheque requested in payment of this claim.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *A.D.M.*

AUDIT OFFICE, OTTAWA, February 11, 1908.

SIR,—I have the honour to acknowledge the receipt of your letter of the 8th instant with further reference to the claim of the Shepody Navigation Company, for steamship service between Moncton and certain ports on the Petitcodiac river during the season of 1907.

I do not think clause 14 of the contract is applicable to the point at issue, and I am still of opinion that the power conferred on the minister by clause 13 should have been exercised, if at all, before the season's service was commenced. However, in view of the fact that the service rendered during the past two seasons, though not as full as the contract called for, has, according to the evidence submitted by the department, been satisfactory to the people chiefly concerned and has apparently been sufficient to comply with the provisions of the vote, I have passed your application.

I think it would be well if, in future, the department would have its contracts for this and similar services so drawn as to make it possible for the contractors to fulfil their contract obligations in accordance with the provisions therein contained.

I am, sir, your obedient servant,

F. C. T. O'Hara, Esq., Acting Deputy Minister. J. FRASER, *A.G.*

St. John, N.B., and Dublin and Belfast, Ireland, Subsidy.

AUDIT OFFICE, OTTAWA, April 27, 1908.

SIR,—I have the honour to acknowledge the receipt of your application of the 22nd inst., for a cheque of $3,000, in favour of the agents of the Ulster Steamship Co., Ltd., being subsidy claimed by them for steamship service between St. John, New Brunswick, and Dublin and Belfast, Ireland, from December, 1907, to April, 1908.

The contract under which this service has been performed calls for two sailings each month at regular intervals during the season of closed navigation on the St. Lawrence, but the service given has not been in accordance with this provision. There was only one sailing each month from St. John during the period in question, and the sailings were not at regular intervals.

Please let me have your explanation.

I am, sir, your obedient servant,

F. C. T. O'Hara, Esq., Acting Deputy Minister. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, April 28, 1908.

SIR,—I beg to acknowledge receipt of your letter of the 27th April, and send you herewith copy of a communication I have just received from Messrs. McLean, Kennedy & Company, agents for the Ulster Steamship Co., Ltd. From this it would appear that the same condition of affairs existed last season as has been the case for several years past. Under the circumstances I think the claim should be passed.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *A.D.M.*

---

39 ST. SACRAMENT ST., MONTREAL, April 27, 1908.

DEAR SIR,—In reply to your favour of 22nd inst., file No. 9897, requesting an explanation regarding the average sailings per month of the Head Line steamers under contract for winter service from St. John, N.B., to Belfast and Dublin, we would respectfully offer you the following explanation:

The service performed during the past season by the Head Line has been performed in a similar manner to that performed by the same steamers for a great many years past. During the past winter the Head Line loaded almost entirely at the Intercolonial Railway terminal, and received from the I.C.R. elevator close on 200,000 bushels of grain, and the general cargo was principally off the I.C.R. connections. Owing to the depressed condition of the freight market it was impossible to secure sufficient cargo to warrant two sailings each month, and, for that reason, we were only able to make one round trip in the months of December, January, February and March.

The winter just passed has been the worst ever known for steamship interests. The markets in the United Kingdom for the sale of merchandise have been practically at a standstill, and while the Canadian shippers were desirous of exporting to get financial returns, practically no sales could be made.

The Head Line were importuning us by cable weekly to take more steamers, as they had set apart certain boats for the Canadian service, and these ships, when we could not use them, have been laid up in Belfast idle, causing a great loss to the management.

We, as the managers here, were practically at our wits end to fill the ships, and all of the shippers, including the St. John agents, Wm. Thomson & Co., will corroborate this statement, and that we went through the market every few days over the entire season in an effort to get more cargo.

We trust that your government will recognize the difficulties of the situation, and, as they have done before, grant the subsidy for the trips performed.

Yours truly,

McLEAN, KENNEDY & CO.,

F. C. T. O'Hara, Esq., Act. Dep. Min., Trade and Com. WM. R. EAKIN, *Agents.*

Canada and Mexico, Pacific Coast Subsidy.

AUDIT OFFICE, OTTAWA, July 5, 1907.

SIR,—I beg to point out, with reference to your application of the 4th instant, for a cheque of $4,166.67, in favour of T. H. Worsnop's attorney, being subsidy claimed for steamship service on the Pacific coast, between British Columbia and Mexico, during the quarter ended June 30, 1907, that, the statement of sailings sent me makes no mention of the port of Vancouver, though the contract, under which this service is performed, calls for a service between Vancouver and Victoria and certain ports in Mexico.

The steamer *Georgia,* employed in the service, seems to have sailed from Victoria, making that port also the terminal of the round trip.

Under clause 4 of the contract the contractor is obliged to send the minister time tables showing the proposed sailings; and as punctuality is one of the conditions of the contract, it is necessary that one of these time tables as furnished the minister should be sent me.

I should like to be informed also of the nature of the evidence in possession of the department in regard to the agreement between the Republic of Mexico and the contractor, mentioned in clause 7 of the contract, and upon the fulfilment of which, payment of the subsidy provided by the Canadian parliament, depends.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, July 10, 1907.

SIR,—I duly received yours of the 5th, having reference to the application for a cheque in favour of T. H. Worsnop's attorney for subsidy for steamship services between British Columbia and Mexico.

I note, as you say, that the statement of sailings makes no mention of the port of Vancouver. Correspondence we have shows that the vessel was at Vancouver; but at the same time, in order to make it absolutely clear, I have written to Mr. Worsnop asking him for the usual certificate with reference to that port.

I further note that you would like to be informed of the nature of the evidence in possession of the department in regard to the agreement between the Republic of Mexico and the contractor, mentioned in clause 7 of the contract, and upon the fulfilment of which payment of subsidy depends. In answer to this, I beg to hand you herewith a copy of Mr. Worsnop's agreement with the Mexican government.

I am, sir, your obedient servant,

The Auditor General. WM. G. PARMELEE, *D.M.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, July 17, 1907.

SIR,—Again referring to yours of the 5th, in which you stated in connection with the claim for subsidy on the steamer *Georgia* of the Pacific Mexican service, that it was not shown that she called at Vancouver but only at Victoria:

As I informed you, I immediately wrote to the contractor and am to-day in receipt of his reply, as per copy herewith, from which you will note the difficulty he had on account of strikes and difficulty in procuring coal to make Vancouver the actual terminal port on that voyage; but you will also note that the *Georgia* did, after calling at Victoria, proceed at once to Vancouver, remaining there for a week, &c. This, I think, meets your objection.

I am, sir, your obedient servant,

The Auditor General. WM. G. PARMELEE, *D.M.*

VICTORIA, B.C., July 11, 1907.

DEAR SIR,—In reply to your favour of July 6, with reference to the subsidy of the s.s. *Georgia*. We beg to state that the reason why the s.s. *Georgia* did not call at Vancouver on her initial trip in April last was that owing to the delay we experienced at Comox in obtaining our bunkers and the coal cargo; then while loading at New Westminster a strike was called by the longshoremen of Vancouver, and we had to complete our work in New Westminster with untrained labour and as the balance of the cargo was being lightered from other saw-mills it was our intention to have gone to Vancouver to finish loading and having the cargo brought there on lighters, but as there was no other cargo at Vancouver and owing to this strike we were compelled to bring the steamer to Victoria for her cargo to be completed, and we were only enabled to get the steamer away when we did by incurring a great expense of overtime and extra pay for the labourers we were able to engage to complete the loading. So it was owing to circumstances over which we had no control that we were forced to omit calling at Vancouver before sailing on her first voyage.

On the *Georgia's* return, after calling at Victoria and discharging her cargo for this port she proceeded at once to Vancouver and was in that port over a week, and we only succeeded in obtaining 10 cases of condensed cream from that port. We were

also compelled to go away without having some repairs that we wished to have effected, owing to the difficulty in obtaining men to do the work.

It is our intention, as per contract, that the steamers shall call at Vancouver on every voyage unless prevented by circumstances over which we have no control.

Until the coal situation is improved it is very difficult to regulate the time of entering and leaving our ports here, as we have to send the steamer to Comox to await her turn at bunkering, otherwise we should not know when we could get it, yet I hope as soon as the strained conditions are improved our arrangements will be able to run with perfect regularity.

Trusting that this explanation will meet with your approval, and asking for leniency for any omissions that I may have made in our starting of this service, and thanking you in anticipation of any guidance or assistance you can kindly render me.

I am, sir, your obedient servant,

The Dep. Minister of Trade and Commerce. T. H. WORSNOP.

Re **Inspection of Staples.**

AUDIT OFFICE, OTTAWA, August 28, 1908.

SIR,—When the accounts of 1906-7 were closed the inspector at Toronto had not accounted for $339.83 of the fees accrued to March 31, 1907.

On the closing of the accounts of 1907-8 he was $234.98 in arrears.

This officer should be required to deposit all arrears and to deposit promptly in the future.

The samples sold at Toronto during the year amounted to $192.72.

The samples sold at Montreal amount to only $13.40, though the total inspections were over twice as much as at Toronto.

Nothing came to account for samples sold at Peterboro.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

Re **Grain Inspection, Winnipeg.**

AUDIT OFFICE, OTTAWA, September 4, 1908.

SIR,—You do not seem to have replied to the letter from this office dated April 13, 1907, in reference to the audit of the revenue from grain inspection, Winnipeg.

From the returns furnished to this office, there is no means of determining that all the fees collected are accounted for.

A clerk from this office visited Winnipeg two years ago, and he arranged with Mr. Horn that counterfoils of receipts issued should be forwarded. During the winter of 1907 some were received, but in such condition that it was not possible to compare them with the returns. It was pointed out in the letter referred to above, what was needful in connection with these counterfoils.

I have to ask for your early consideration.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

AUDIT OFFICE, OTTAWA, September 4, 1908.

SIR,—When the accounts of 1907-8 were closed, the following fees accrued previous to March 31st were unpaid:—

Canadian Northern Railway	$4,245 30
Immigration Department	20 00
Cons. Elevator Co., Duluth	16 80
Anchor Elevator Co.	20 25
Western Can. Flour M. Co.	7 25

The inspections returned against the Great Northern Duluth, commencing October, amounted to $361.50, while the deposit that came to account amounted to $455.50. Please explain.

There was no weighing returned against this company nor against the Cons. Elevator, Duluth.

There are, on the other hand, 10 or 12 companies against which weighing fees are returned, but nothing for inspections.

During the first five months of the fiscal year inspection fees $5,277.90, and weighing fees, $3,171.05 were returned against the British America Elevator Co.; nothing since.

No fees are returned against the Port Arthur Elevator Co. previous to September. Awaiting reply.

I am, sir, your obedient servant,

The Deputy Minister of Trade and Commerce. J. FRASER, *A.G.*

DEPT. OF TRADE AND COMMERCE, OTTAWA, September 10, 1908.

SIR,—With regard to yours of the 4th instant *re* inspection of staples, Winnipeg, I have to state as follows:—

The amount due by Canadian Northern Railway, viz.: $4,245.20, has been paid as indicated on statement herewith. The $20 stated to be unpaid by the Immigration Department was paid in April, 1907 (the month in which it accrued), and is recorded on statement.

The $7.25 due by Western Canada Flour Mills Co., was covered by draft No. 11, dated June 23, 1908. The chief inspector at Winnipeg has been written to about the amounts unpaid by Consolidated Elevator, Duluth and The Anchor Elevator Company, as well as the over payment made by the Great Northern Elevator, Duluth. On receipt of a reply from him you will be communicated with.

No weighing is done at Duluth for either the Consolidated or Great Northern Elevators. The inspection is carried on to preserve the identity of the grain by grade, &c.

A great many companies pay weighing fees, that do not pay inspection fees. The latter are charged mainly to the railroads and large terminals.

The British America Elevator Company ceased to do business as such on August 31, 1907, and was replaced by the Port Arthur Elevator Company from September 1. They are practically the same people under a different name.

I am, sir, your obedient servant,

The Auditor General. F. C. T. O'HARA, *D.M.*
